Introduction.

Before entering upon an inquiry about the date of Mahâvîra's Nirvâṇa, we must first discuss the question whether Jainism and Buddhism had each its separate and independent origin, or the one was a division of the other. European scholars who have written on the subject, have been generally inclined to take the latter view. Colebrooke believed Mahâvîra to have been the teacher of Gautama-Buddha because one of Mahâvîra's disciples, Indrabhûti, is often called Gotamasvâmin or simply Gotama. Prinsep and Stevenson have adopted his opinion, and, lately, Mr. Ed. Thomas has repeated it. Prof. Weber, in his book "Ueber das Çatruñjayamâhâtmyam" has proved how weak the argument is, on which Colebrooke's theory is based. For Indrabhûti was a Brâhmaṇa, and not a Kshattriya like Gautama-Buddha, and his belonging to the gotra of Gotama is insufficient to prove his identity with the latter. If Indrabhûti had forsaken the religion of Vardhamâna in order to found a rival sect, the Jaina sûtras, which have been composed some time after the Nirvâṇa, would, most certainly, speak not favourably of him as they continually do; but they would abuse him to their heart's content, though he was a favourite of Mahâvîra [1]). For the sûtras plainly state that Jamâli, the sister's son of Mahâvîra, caused the first schism, and the Bhagavatî (*saya* 17) sneers at another disciple of Mahâvîra, Gosâle Makkhaliputte — who, by the by, is evidently identical with the Maṃkhali-Gosâlo mentioned in the Pâli sûtras as one of the "six heretical teachers' and opponents of Buddha.

Prof. H. Wilson, in his essay on the Religious sects of the Hindus, starts a theory entirely opposed to that of Colebrooke.

1) There is a legend about Indrabhûti which shows how much he was attached to his teacher. At the time of Mahâvîra's death he was absent. On his return, hearing of his beloved teacher's sudden decease, he was overcome with grief. He then became aware that the last remaining bond which tied him to the saṃsâra, was the feeling of love he still entertained for his teacher. Therefore he cut asunder that bond, and thus, *chinnapiyabaṃdhaṇe*, he reached the state of a *kevalin*. He died a month after Mahâvîra's Nirvâṇa.

He makes the Jainas a division of the Bauddhas, which grew out of the downfall of Buddhism about the tenth century A.D. Prof. A. Weber, in the work mentioned above, concedes a higher antiquity to the sect, but he agrees with H. Wilson as to the priority of Buddhism. Prof. Lassen, upon the whole, has followed Weber's opinion (Ind. Alterth. IV 755 sqq.). Some reasons seem, at first sight, to speak in favour of Prof. Wilson's theory. For the Jaina sûtras represent Mahâvîra not only as a native of Behar, the country which was the scene of Buddha's life and preaching, but also as a contemporary who was patronised by the same kings as Buddha. Though the names Çreṇika and Kûṇika (or Koṇika) are not those which are commonly used in Buddhist writings, still Çreṇya or Çreṇika is known as a *biruda* of Bimbisâra; and his son Kûṇika, also called Bibbhisâraputte [1]), is evidently identical with Bimbisâra's son, Ajâtaçatru, because either of them is stated by the Jainas and Bauddhas respectively to have caused his father's death. Kûṇika's son Udâyin who, according to Jaina tradition, founded Pâṭaliputra, will be readily identified with Udayibhaddako, son of Ajâtaçatru, about whom the Bauddhas relate the same. Thus no doubt remains that the contemporaries of Buddha, Bimbisâra and Ajâtaçatru, recur, hidden under other names (Çreṇika and Kûṇika), in the Jaina *aṅgas* as those of Mahâvîra. This holds good even of minor personages, such as Gosâla, the son of Maṃkhali (or Makkhali as the Jainas have it; Maṃkhali :Makkhali: :Bimbisâra: Bibbhisâra), and the Licchavi kings (the Lecchaî of the Jainas). As a further argument in favour of Prof. Wilson's theory, it has been said that both Çâkyasiṃha and Vardhamâna have the same epithets, Buddha, Jina, and Mahâvîra, and the wife of either was named Yaçodâ. But here all analogy ceases. None of the particulars which are related of Buddha, agree with those given regarding Vardhamâna. Thus the names of the relatives of either and their native towns, their disciples, the length and remarkable events of their lives, the characters of both men, as far as they are revealed by their teaching, totally differ. I shall enlarge upon the last mentioned point only, because the former ones need no further comment. Mahâvîra was, as far as I can judge, of an ascetic turn of mind; his doctrines are chiefly concerned with metaphysics and religious practices. His philosophy or theology is not remarkable for its logical consistency, for it substitutes minute and elaborate distinctions for a deep and exhaustive inquiry, and avoids the danger of the doctrine of Nihilism, which Buddhism does face, by the theory of the syâdvâda, which possesses some resemblance to, but not the depth of, the Heraclitic ῥεῖ τὰ πάντα. Mahâvîra shares the common belief in the existence of a permanent soul

1) *e. g.* in the Aupapâtikasûtra. Hemacandra gives the form Bambhasâra. Petersburgh Dictionary s. v.

and the efficacy of religious penances, two doctrines which are opposed by the Bauddhas. His ethics went scarcely beyond rules for monks, as the ethics of most religious sects of the Hindus do. In short, Mahâvîra was rather of the ordinary cast of religious men in India; he may be allowed a talent for religious matters, but he possessed not the genius Buddha undoubtedly had. Buddha followed up his philosophical ideas to the very brink of Nihilism, striving throughout for clearness in argumentation rather than for ingeniousness in scholastic distinctions. Therefore, his philosophy forms a system based on a few fundamental ideas, whilst that of Mahâvîra scarcely forms a system, but is merely a sum of opinions (*pannattis*) on various subjects, no fundamental ideas being there to uphold the mass of metaphysical matter. Besides his consistency in speculation, there is another still more obvious mark of superiority in Buddha, viz. his deep moral sense and his compassionate feeling for the miseries of men which he vented in so many admirable aphorisms and apologues. It is the ethical element that gives to the Buddhist writings their superiority over those of the Jainas. Mahâvîra treated, as I have stated, ethics as corollary and subordinate to his metaphysics, with which he was chiefly concerned. This outline of Buddha's and Mahâvîra's teaching leads to the belief that they were two distinct persons. The differences between the doctrines of the one and those of the other are also very considerable, and even the technical terms in which their fundamental ideas are conveyed, do not agree. Finding thus the difficulties multiply, if we try to identify Mahâvîra and Buddha, we feel inclined to give credence to the traditions of the Bauddhas and Jainas that Buddha and Mahâvîra were two distinct personages, but contemporaries. On that supposition, the general resemblance between the two sects will at once appear natural. For two founders of religious sects, living at the same time and in the same country, had of course to draw on the same stock of general ideas, philosophical and ethical, which were common to the whole generation. And that generation seems to have had a tendency to oppose Brahminical orthodoxy. For if we read the account of the doctrines of the six heretical teachers at the time of Buddha, given in the Sâmaññaphalasutta of the Bauddhas, we find that they were all, more or less, reformers, and that Buddha differed from them only by the superiority of his genius. Therefore it is not against reason and probability that another reformer of Buddha's time succeeded likewise in founding an independent sect. Before I bring forward such arguments as are, in my opinion, sufficient to establish that theory as an historical truth, we must meet two counter-arguments which have been adduced by the defenders of the priority of Buddhism. First, it has been believed, on the authority of Hamilton Buchanan, if I am not mistaken, that the Jainas acknowledge the system of caste, and on

that belief the following theory of the origin of Jainism was based. The Bauddhas being persecuted by the Brahmins adopted the system of caste by way of accommodation to their fanatical rivals, who would have entirely suppressed heterodoxy, but for that concession. Thus, it was imagined, declining Buddhism changed into Jainism. I will not discuss the theory, but I deny the fact. The Jaina community is only divided into *yatis* and *çrâvakas*, and if in any part of India the Jainas practically recognise the distinctions of caste, it is just the same with the Christians and Mahomedans of Southern India, and even with the Bauddhas of Ceylon. This has nothing to do with the religion, it is only the adoption of social distinctions, which are rooted too deeply in the mind of the Indian nation as to be abolished by the word of a religious reformer. The Buddhist writings speak frequently of Brâhmaṇas, but nobody would for that reason accuse the Bauddhas of an adoption of the religious system of cast. Secondly, it has been considered as a proof of the priority of Buddhism that Pâli is a more archaic language than the Prâkṛit of the Jainas. The fact is true, but it proves nothing. For I shall show in the sequel that the form of the Jaina sûtras as we have them now, was fixed only one thousand years after Mahâvîra's death. It is but reasonable that during the preceding millennium the language of the sûtras underwent great alterations in consequence of the natural tendency of those who handed down the sûtras by oral tradition or writing, to substitute current idioms for antiquated forms; just as the works of German authors of the middle ages were transcribed into the dialect of the scribe's country and time. In one instance, however, a trace of the original language is left, sufficient to show that it differed from the written language in one of its most characteristic features. Words like agaṇî, âcariya, suhuma etc. as they are written in the sûtras, must according to the evidence of the metres, have been pronounced: agṇî âcarya ṣuhma etc. But the authors of the sûtras could not have spoken thus, if their language had followed the phonetic rules common to all Prâkṛits, to which the written language of the sûtras avowedly belongs. For a fuller discussion of the point in question I refer the reader to the "Zeitschrift für vergleichende Sprachforschung" v. XXIII, p. 594 sqq. The few facts quoted above will suffice to show that the form of the language cannot be adduced as an argument against the antiquity of the Jaina literature; it is even less valid as a proof against the antiquity of Jainism. Finally, we know that a part of the Jaina literature, the fourteen pûrvas, has been lost, but we know not in what language the pûrvas were composed.

We have seen that the holy books of the Jainas point to the age of Bimbisâra and Ajâtaçatru as the time of Mahâvîra's life. It will now be necessary to trace the Jaina sect back, if possible, to that early period. The most general term for Jaina monks in

the sûtras is *Niggaṃtha*, and for the nuns *Niggaṃthî*; Varâhamihira and Hemacandra call them *Nirgranthas*, whilst other writers substitute synonyms such as *Vivasana*, *Muktâmbara* etc. (Petersburgh Dictionary s. vv. Çaṃkara and Ânandagiri to Vedânta Darçana II, 2, 33.) It should be noticed that the older word *Arhata* and the more modern one *Jaina* apply as well to the lay community as to the monks. The name *nirgrantha* for religious men different from the *Çramaṇas* of the Bauddhas occurs under the form *Niganṭha* in the Açoka inscriptions (Lassen. Ind. Alt. vol. II, p. 468., 2nd ed.), and has already been identified by Dr. Bühler (Three new edicts of Açoka p. 6) with the Jaina *Nirgranthas*. The Piṭakas of the Bauddhas often mention the *Niganṭhas* as opponents of Buddha and his followers (see Childers. Pâli Dictionary s. v. *niganṭha*). These facts prove that, as far as the Buddhist writings reach, the Jainas and Bauddhas were rivals; and the early existence of this rivalry may perhaps be inferred from some of their ancient historical legends. Thus, whilst the Bauddhas expressly state that Ajâtaçatru killed his father, and that he was of a cruel and wicked disposition previous to his conversion to the true faith, the Jainas try to white-wash Kûṇika, whom we have already identified with Ajâtaçatru, from the stain of intentional parricide. For the Nirayâvalisûtra tells a long story how Kûṇika fancied himself unjustly treated by his father, and for that reason put his father into prison. But his mother told him that his father had always been kind to him, and that by no deeds of his he had merited such a treatment at the hand of his son. Kûṇika, being convinced by his mother, took up an axe to cut asunder his father's fetters. On seeing his son approach with an axe in his hand, Çreṇika believed that he was to be killed. To save his family from such a crime, he committed suicide. Kûṇika of course was very much afflicted when he found his father dead etc. etc. This story, told with an amusing *naïveté*, shows that the Jainas had reason to speak with less candour of their patron's sins than the Bauddhas; and that reason probably was, that the monarch had received the Jainas into his favour long before he extended it to the Bauddhas.

In the same manner, an early date for the distinct personality of Mahâvîra, who may either be considered as the founder of the sect, or as a reformer of an already existing creed, which latter view of the matter I am inclined to adopt, can be established. First, an inscription found in the Kankali mound at Mathurâ by General Cunningham, begins with a salutation to the Arhat Mahâvîra Devanâsa. (Archeol. Survey of India vol. III, p. 35., Ed. Thomas. Jainism or the early creed of Açoka p. 82.) As the inscription is appended to a "Naked standing figure", it is apparent that Mahâvîra is intended for Vardhamâna, and not for Buddha. The inscription is dated *saṃvatsare* 98, and though it has not yet been

settled to what Era the dates of the inscriptions found at Mathurâ refer, the occurrence of Huvishka's and Kanishka's names proves that they belong to the beginning of our era. Secondly, in Buddhist writings the founder of the Jaina faith is mentioned, though not under one of his common names, but as Niganṭhanâtha or Niganṭha Nâtaputta. Niganṭha we know already as a term for Jaina monks. Nâtaputta I identify with Nâyaputta, a *biruda* of Mahâvîra, used in the Kalpasûtra and the Uttarâdhyayanasûtra. The Buddhist books of Nepal call Niganṭhanâtha the son of Djñâti (Burnouf. Lotus de la bonne loi p. 450) and the Jainas call him Jñâtaputra (see Petersburgh Dictionary s. v. jñâtaputra), cf. also the following çloka from Hemacandra's Pariçishṭaparvan I, 3.

Kalyâṇapâdapârâmaṃ çrutagaṅgâhimâcalam |
viçvâmbhojaraviṃ devaṃ vande çrî-Jñâtanandanam ||

That name is given to Mahâvîra because of his father's being a *jñâtakshattriya* cf. Kalpasûtra § 110. — Niganṭha Nâtaputta is, in the Sâmaññaphalasutta, called an Agnivaiçyâyana. That must be a mistake of the Bauddha tradition, for Mahâvîra was a Gautama. But we can account for this mistake by supposing that the Bauddhas confounded the founder of the sect with his chief disciple Sudharman, who is so very often mentioned in the sûtras as the propounder of Mahâvîra's doctrines to Jambusvâmin, and who was an Agnivaiçyâyana. Unfortunately the passage of the Sâmaññaphalasutta which gives the doctrines of Niganṭha Nâtaputta, is not explicit and clear; but the conjectural translation of it, I may state, contains nothing to preclude the identification of Niganṭha Nâtaputta with Mahâvîra. That is born out to full evidence by a legend which first led Dr. Bühler to identify the Niganṭhanâtha with Mahâvîra. It is told in the Âtmâvatâra (Hardy. Manual of Buddhism p. 271), the Vaiçyantara, and other Buddhist books, that the Niganṭhanâtha died in Pâvâ, after having had a dispute with his former disciple Upâli, who had embraced the doctrines of Buddha. As the death of Mahâvîra did take place in Pâvâ (Kalpasûtra § 122), and as the Jaina monks were called Niganṭhas, it is beyond doubt that by Niganṭhanâtha the same person as Mahâvîra is intended.

The result of the preceding inquiry, that Buddha and Mahâvîra were two distinct persons but contemporaries, furnishes us with a clue to the Jaina chronology. It is obvious that the Nirvâṇas of both teachers can be separated by a few years only. Therefore the Nirvâṇa of Mahâvîra must fall somewhere within 490 and 460 B.C., because the adjusted date of Buddha's Nirvâṇa, 477 B.C., has, since the discovery of the three new edicts of Açoka by General Cunningham, and their historical and philological interpretation by Dr. Bühler, been proved to be correct between very narrow limits.

The traditional date of Mahâvîra's Nirvâṇa is 470 years before Vikrama according to the Çvetâmbaras, and 605 according to the Digambaras. The interval of 135 years between the dates of the

Nirvâṇa as recorded by the two sects, being equal to that between the Saṃvat and Çaka Eras, makes it probable that the Vikrama of the Digambaras is intended for Çâlivâhana, who is always confounded with the older Vikrama. That the Çvetâmbaras date from 57 B.C. will be proved in the sequel. The tradition that 470 years elapsed between the Nirvâṇa and the beginning of Vikramâditya's Era is embodied in many books of the Çvetâmbaras. The oldest evidence for it are those *versus memoriales* which form the basis of Merutuṅga's Vicâraçreṇi, and specify the interval between Vikramâditya and the Nirvâṇa by the number of years which are allotted to the intervening dynasties. I subjoin them here, and add the remarks of Dr. Bühler, who has first published them (Indian Antiquary II. 362).

jaṃ rayaṇiṃ kâlagao
arihâ titthaṃkaro Mahâvîra |
taṃ rayaṇim Avaṃti-vaî
ahisitto Pâlago râyâ || 1 ||

tîsaṃ cia Pûsamittassa || 2 ||
Balamitta-Bhânumittâ
saṭṭhî varisâṇi catta Nahavahaṇe |
taha Gaddabhilla-rajjaṃ
terasa varisâ Sagassa cau || 3 ||

1. Pâlaka, the Lord of Avantî, was anointed in that night in which the Arhat and Tîrthaṃkara Mahâvîra entered Nirvâṇa.

2. Sixty are (the years) of king Pâlaka, but one hundred and fifty five are (the years) of the Nandas; one hundred and eight those of the Mauryas, and thirty those of Pûsamitta [Pushyamitra].

3. Sixty (years) ruled Balamitra and Bhânumitra, forty Nabhovâhana. Thirteen years likewise lasted the rule of Gardabhilla, and four are the years of Çaka.

"These verses, which are quoted in a very large number of commentaries and chronological works, but the origin of which is by no means clear, give the adjustement between the eras of Vîra and Vikrama, and form the basis of the earlier Jaina chronology".

The sum of years elapsed between the commencement of the Era of Vikrama and the reign of the Mauryas as stated in the verses just quoted, is $255 = 4 + 13 + 40 + 60 + 30 + 108$. By adding 57, the number of years expired between the commencements of the Saṃvat and the Christian Eras, we arrive at 312 B.C. as the date of Candragupta's abhisheka. The near coincidence of this date with the date derived from Greek sources, proves that the Vikrama of the third verse is intended for the founder of the Saṃvat era (57 B.C.), and not for the founder of the Çaka Era (78 A.D.), because on the latter premiss Candragupta's abhisheka

would date 177 B.C. [1]). The reigns of Pâlaka (60) and of the nine Nandas (155), in sum 215 years, make up the interval between Candragupta and the Nirvâṇa; adding 215 to 312 B.C., we arrive at 527 B.C. as the epoch of Mahâvîra's Nirvâṇa, differing by sixteen years from the Nirvâṇa of Buddha, according to the chronology of Ceylon, or 543 B.C.

There is also a different statement of the interval between the Nirvâṇa and Candragupta's coronation. For Hemacandra says in the Pariçishṭaparvan VIII, 341

evaṃ ca çrî Mahâvîre mukte varshaçate gate |
pañcapañcâçadadhike Candragupto 'bhavan nṛipaḥ ||

"And thus 155 years after the liberation of Mahâvîra, Candragupta became king".

Adding 155 to 312 B.C. we find that the Nirvâṇa of Mahâvîra would fall 467 B.C.

The gâthâs assign just as many years to the reign of the Nandas, as Hemacandra allots to the whole interval between Candragupta and the Nirvâṇa. Hence it would appear that he has taken no account of the 60 years of Pâlaka's reign. It is difficult to believe that Hemacandra should have made such a gross blunder. I, therefore, think it more probable that the tradition he followed, differed from that incorporated in the chronological gâthâs, which latter deserves, in my opinion, less credit. Not only is the number of years (155) allotted in the gâthâs to the reign of the Nandas unduly great, but also the introduction of Pâlaka, lord of Avanti, in the chronology of the Mâgadha kings looks very suspicious. Neither the Bauddhas nor the Brahmins mention a prince of that name. There is a Pâlaka amongst the kings of Magadha, but he belongs to the Pradyota line which preceded the Çaiçunâgas, princes of which dynasty were the contemporaries of Mahâvîra. There is another Pâlaka mentioned in the Mṛicchakaṭikâ, who was king of Ujjayinî or Avantî, and is said to have been dethroned by Âryaka. This Pâlaka is perhaps the same as the Pâlaka, mentioned, in the Kathâsaritsâgara, as brother-in-law of Udayana, the fabulous king of Vatsa. That king was, perhaps, mistaken for Udâyin, son of Kûṇika, and thus Pâlaka, king of Avanti, came, perhaps, to be mistaken for the Prâdyôta of the same name, and was then made the contemporary of Mahâvîra. However this may have been, Pâlaka had, most

1) I call attention to the fact that this date of Candragupta's abhisheka coincides with the beginning of the Seleucidan Era. Mr. Ed. Thomas (Records of the Gupta Dynasty in India p. 17, 18) believes that the Seleucidan Era maintained for a long time its ground in Upper India and exerted much influence upon the chronological records of the succeeding dynasties. If the correctness of Mr. Thomas' theory could be demonstrated by direct proof, it would be easy to account for the rather puzzling fact that the Jaina date of Candragupta's abhisheka comes so near the truth.

probably, no place in the original chronology of the Jainas. He is, I am inclined to believe, a mere chronological fiction of the Jainas introduced into their history in order to make it better agree with the Buddhist chronology of Ceylon. For the discrepancy of sixty years between the traditional date of Mahâvîra's Nirvâṇa and the one inferred from Hemacandra's statement, reminds us too strongly of a similar discrepancy of 66 years incorporated in the chronology of the Bauddhas, to think of an independent origin of both. We know that the Jainas were once numerous and powerful amongst the Tamulians. For a strong influence of Jainism can be traced in the early Tamil literature as noticed by Graul and Caldwell[1]). It was perhaps then and there, that the Jainas, living on the continent opposite to Ceylon, were influenced by the Bauddhas, and altered their own chronology after the model of that of the rival sect. But this is, of course, a mere conjecture, and I will not lessen its value by urging it too far. To return to our discussion of the date of the Nirvâṇa, it is obvious that the year 467 B.C. which we inferred from Hemacandra's record, can not be far wrong, because it agrees so very well with the adjusted date of Buddha's Nirvâṇa 477 B.C., a synchronism which by our previous research has been established as necessary.

The greater value of the adjusted date of the Nirvâṇa as compared with the traditional one can, moreover, be established by collateral proofs adduced from Jaina history. For the Âvaçyakasûtra, one of the âgamas or sacred books of the Jainas, gives, in the chapter called uvaghâya nijjutti, details of the six nihnavas or schisms; they are repeated at greater length in the Ṭîka of the Uttarâdhyayana by Devendraganin sam 1179 (navakarahara)[2]). The third nihnava, the avyaktamatam, was, according to both authorities, originated 214 A.V. by the disciples of Âshâḍha. The Mauryaking of Râjagṛiha, Balabhadra, (Muriya Balabhadda A.S., Moriyavaṃsapasûo U.Ṭ.) brought the heretics back to the right faith. If the gâthâs were right in dating the Maurya dynasty from 215 A.V., a branch of that family could hardly have reigned at Râjagṛiha 214 A.V. But there is no improbability in the statement if we accept Hemacandra's date according to which the Maurya dynasty begins 155 years after the Nirvâṇa; this involves, of course, the correctness of the adjusted date of the Nirvâṇa. To the same result we are led by the following consideration. Mahâgiri and Suhastin were, according to all Therâvalîs, disciples of Sthûlabhadra, who is unanimously said by all writers to have

1) See Caldwell, compar. Gram. of Dravidian languages intr. p. 129 note.

2) This Ṭikâ has been extracted from the vṛitti of Çântyâcârya. The explanation of the text is his own work; the numerous legends told in his commentary are verbally copied from that of Çântyâcârya.

died 215 A.V. After the demise of Mahâgiri, which event is placed by Merutuṅga 245 years after the Nirvâṇa, Suhastin became *yugapradhâna*. He won over Samprati, grandson and successor of Açoka, to the Jaina creed. As Açoka died 94 years after Candragupta's abhisheka (256 A.B.—162), Samprati's reign would date from 309 A.V. (215 + 94) according to the chronological gâthâs, or from 249 A.V. (155 + 94) according to Hemacandra's account. The latter date is the only one possible, because Samprati and Suhastin (245) were contemporaries, and as it is based on the same record, from which we deduced the adjusted date of the Nirvâṇa, it is valid as an auxiliary proof for the correctness of the latter[1]).

I shall now pass to the statement of the Jainas regarding Bhadrabâhu, the reputed author of the Kalpasûtra. The few facts known of that Thera are mixed up with a good deal of what is clearly legendary; but it is impossible to separate throughout truth from fiction. Nevertheless, we must try to find out the historical basis in the legends of Bhadrabâhu. For this purpose, a chronological arrangement of the authorities consulted will be indispensible. I divide them into three classes. The first of them contains 1) the two Therâvalîs embodied in the Kalpasûtra, and that placed at the head of the Âvaçyaka and Nandî Sûtras; 2) the Ṛishimaṇḍalasûtra by Dharmaghosha. These works are later than 980 A.V. Many centuries younger than the works just mentioned is the

1) Having concluded our chronological investigation, I must add a few words about the attempts made by former writers to fix the initial date of the Jainas. The want of sufficient information which proved fatal to them in the attempt to form a correct idea of the origin of Jainism, was, of course, a still greater obstacle in chronological researches. Prof. Weber combining the legendary traditions that the Kalpasûtra was read to a king Dhruvasena 980 A.V., and that a Çîlâditya reigned 947 A.V., assigned the year 349 B.C. to the death of Mahâvira. Even if the dates which form the basis of Prof. Weber's calculation were correct — which however is open to grave doubts — we should still be at a loss to ascertain which of the three Dhruvasenas, and which of the six Çîlâdityas known as yet, are the persons intended in the above mentioned records. Besides this incertitude, the chronology of the Valabhi dynasty on which the calculations of Prof. Weber are based, is as yet an unsolved problem. As Prof. Lassen's arguments in criticising Prof. Weber's result (Ind. Alt. IV. p. 762. sqq.) are founded on the same unsafe ground, we can pass them over without further remarks. The Çatruñjayamâhâtmyam, that "wretched forgery by some yati of the 12th or 14th century" as Dr. Bühler calls it (Three new edicts of Açoka, p. 21. note), contains at least the common tradition that Mahâvira died 470 years before Vikrama. But neither Weber nor Lassen could see the importance of this statement, because at the time they wrote, it appeared a settled point that Jainism was of a comparatively modern origin. This prejudice had, of course, to disappear before a more extensive knowledge of the Jaina literature than could be had twenty years ago. Thanks to the endeavours of Dr. Bühler, the whole of the Jaina literature has been made accessible to European scholars, and we are no more obliged to draw our information of Jainism from fragmentary and dubious sources.

Pariçishṭaparvan by Hemacandra. To the third class belong the legends incorporated in the more modern commentaries of the Kalpasûtra, the *vṛitti* of the Ṛishimaṇḍalasûtra by Padmamandiragaṇin (finished saṃ 1513 at Jesulmer), and similar works.

According to the Therâvalis, Bhadrabâhu was the sixth Thera (or *Sthavira* in Saṃskṛit) after Mahâvîra. The name of his Gotra is Prâcina, which means, probably, only "an old gotra", because a gotra of that name does not occur elsewhere in Indian books. Bhadrabâhu was the disciple of Yaçobhadra, and had, as stated in the more detailed Therâvalî of the Kalpasûtra, four disciples, Godâsa, Agnidatta, Janadatta and Sûmadatta, the first of whom founded the Godâsagaṇa.

In the Ṛishimaṇḍalasûtra only one verse (167) is devoted to Bhadrabâhu, whilst his successor Sthûlabhadra is praised in a score of stanzas. It runs thus:

dasa-kappa-vvavahârâ
nijjûḍhâ jeṇa navama-puvvâo |
vaṃdâmi Bhaddabâhuṃ
tam apacchima-sayala-suya-nâṇi ||

"I adore Bhadrabâhu, the last of those who were possessed of the whole sacred lore, who extracted the ten kalpas and the vyavahâra from the ninth pûrva." *Apacchima* might be translated: "not the last", but as it has usually the sense of "the very last", I have thus rendered it in our verse, though the common tradition makes Bhadrabâhu the last but one of the *çrutakevalins*, Sthûlabhadra being the last who knew all the fourteen pûrvas. Sthûlabhadra's successors down to Vajra possessed only ten pûrvas, and are for that reason called *daçapûrvins*. After Vajra the knowledge of the pûrvas was entirely lost, see Hemacandra's Abhidhânacintâmani 33, 34. The same author relates in the ninth sarga of the Pariçishṭaparvan, how it happened that the last four pûrvas became extinct with Sthûlabhadra. The saṅgha of Pâṭaliputra, having collected the 11 aṅgas, sent, in order to procure the twelfth, the dṛishṭivâda, Sthûlabhadra and 499 other sâdhus to Bhadrabâhu, who was then staying in Nepal. In consequence of his having undertaken the mahâprâṇavrata, he could teach his pupils at such a slow rate only, that after some time all were wearied and fell away, except Sthûlabhadra. He learned from the mouth of Bhadrabâhu ten pûrvas in as many years. Then Bhadrabâhu found fault with him, and refused to teach him the rest of the pûrvas. But on Sthûlabhadra's entreaty, he continued his teaching on the condition that he should teach nobody else the last four pûrvas. Dharmaghosha's words can be reconciled to this legend on the supposition that he regarded Sthûlabhadra's knowledge as imperfect, because he could not impart the whole of it to others. Therefore, Bhadrabâhu's knowledge was superior, and he could be called *apacchima-sayala-suya-nâṇi*. But this inter-

pretation is rather laboured, and I should, therefore, prefer to believe that the older tradition made Bhadrabâhu the last *çrutakevalin*, and that in later times Sthûlabhadra, of whom so many stories are told, was included in the number of those priviledged sages.

By the first half of Dharmagosha's stanza we are informed that Bhadrabâhu extracted the daçakalpas and the Vyavahâra (sûtra) from the ninth pûrva. In the introduction of most commentaries of the Kalpasûtra ten kalpas are spoken of (Stevenson, Kalpasûtra p. 3 sqq.). Therefore, by *Dasakappa* the Kalpasûtra is most probably intended. The Vyavahârasûtra is one of the chedas, a class of the âgamas. (Bühler, Report on Sanscrit MSS. 1872—1873, p. 12.) In the vṛitti of the Ṛishimaṇḍalasûtra a longer list of Bhadrabâhu's works is given.

Daçâvaikâlikasy' Âcârâṅga-Sûtrakṛitâṅgayoḥ |
Uttarâdhyayana-Sûryaprajñaptyoḥ Kalakasya ca ||
Vyavahâra-Ṛshibhâshit'-Âvaçyakânâm ivâḥ (?) kramât |
Daçâçrutâkhyaskandhasya niryuktîr daça so 'tanot ||
tathâ 'nyâm bhagavâṃç cakre saṃhitâm Bhâdrabâhavîm.

"He composed the ten *niryuktis*, namely the (*niryuktis*) of the Daçâvaikâlika, Âcârâṅga, Sûtrakṛitâṅga, Uttarâdhyayana, Sûryaprajñapti, Kalaka (?), Vyavahâra, Ṛishibhâshita, Âvaçyaka, and then (itaḥ kramât) that of the Daçâçrutaskandha; the venerable (Bhadrabâhu) also composed an other saṃhitâ, the Bhâdrabâhavî." Dr. Bühler has already noticed that the Niryuktis of the aṅgas are attributed to Bhadrabâhu (l. c. p. 6.), and he has succeeded in procuring copies of the Âcârâṅganiryukti and the Oghaniryukti. In the sequel it will appear probable that Bhadrabâhu did not compose the Niryukti of, but the Daçâçrutaskandha itself. That work is sometimes mistaken for the Kalpasûtra. Of the Saṃhitâ we shall speak below. Besides these works, the Uvasaggaharastotra is attributed to Bhadrabâhu in a gâthâ found in the kathânakas of the Kalpasûtra:

uvasaggaharaṃ thuttaṃ
kâûṇaṃ jeṇa saṃgha-kallâṇaṃ |
karuṇâ-pareṇa vihiaṃ
sa Bhaddabâhu gurû jayau ||

"Victory to Bhadrabâhusvâmin who by composing the Uvasaggahara-stotra bestowed, out of pity, happiness on the saṅgha".

I subjoin, in the note, the text and translation of that stotra which, if really of Bhadrabâhu's composition, is the oldest specimen of the now extensive literature of Jaina hymns [1]).

---

1) uvasaggaharaṃ Pâsaṃ Pâsaṃ vaṃdâmi kamma-ghaṇa-mukkaṃ |
visahara-visa-ninnâsaṃ maṃgala-kallâṇa-âvâsaṃ || 1 ||
visahara-phulimga-maṃtaṃ kaṃṭhe dhârei jo sayâ maṇuo |
tassa gaha-roga-mâri-duṭṭha-jarâ jaṃti uvasâṇam || 2 ||
ciṭṭhau dûre maṃto tujjha paṇâmo vi bahuphalo hoi |

The date of Bhadrabâhu's death is placed identically by all Jaina authors, from Hemacandra down to the most modern scholiast, in the year 170 A.V. Hem. Pariçishṭaparvan IX, 112:

Vîra-mokshâd varsha-çate saptaty-agre gate sati |
Bhadrabâhur api svâmî yayau svargaṃ samâdhinâ ||

"After hundred and seventy years from the liberation of Mahâvîra had elapsed, Bhadrabâhusvâmin also reached svarga (siddhi) by profound meditation".

It may be remarked that the dates of the Çrutakevalins only are given; I dare not decide whether they may be relied on.

A legendary story about the rivalry between Bhadrabâhu and Varâhamihira, is told by a great many modern Jaina writers, but not by Hemacandra. It seems to have grown out of the fact that Bhadrabâhu was regarded as the author of two astronomical works, a commentary on the Sûryaprajñapti and the Bhâdrabâhavî Saṃhitâ, and of the Uvasaggahara stotra, and that Jaina astronomy was scornfully treated by other astronomers (see Siddhântaçiromaṇi III, 10). For these motives will be recognized in the legend which I shall now briefly relate. Bhadrabâhu and Varâhamihira, two brothers living in Pratishṭhâna, had become Jaina monks. Before his death, Yaçobhadra appointed Saṃbhûtivijaya and Bhadrabâhu his successors to the dignity of âcârya. Varâhamihira who had expected for himself that distinction, forsook the Jaina religion, furious with disappointment. By his learning in astronomy, he won a great reputation which he strengthened by spreading a fabricated story. He told the easily deceived people that by his zeal he had propitiated the Sun, who had taken him into his car, and shown him the movements of the celestial bodies. By such means he succeeded in gaining the favour of the king and in ousting the

1. „I adore Pârçva, the expeller of evil spirits, Pârçva, who is free from all (or the eight) karmas, who destroys the poison of the poisonous (snakes), the abode of prosperity and happiness.

2. Whatever man knows always by heart (this) charm against snakes and fire (?), for him disaster, disease, pestilence, and decrepit age, will go to destruction.

3. Not to speak of a hymn, a mere obeisance paid to Thee will richly be rewarded: living beings, amongst men and animals do not fall into misfortune and unhappiness.

4. Living beings having attained a correct comprehension of Thee — which surpasses (in value) the Kalpadruma and the philosopher's stone — reach, without obstacle, a station free from decrepitude and death.

5. Thus praised, Glorious one! with a heart full of mighty devotion, Pârçva! mayest thou, o God! therefore, give perfect wisdom in every birth, Moon of the Jinas"!

Jainas from it. At last, Bhadrabâhu came to the help of his correligionists and defeated his brother by his superior knowledge of astronomy. Humiliation and anger caused the death of Varâhamihira, who became an evil spirit (dushṭavyantara). As such he brought diseases in the houses of the Jainas, until Bhadrabâhu drove him away by means of the Uvasaggahara stotra. Bhadrabâhu then composed a Saṃhitâ named after him.

The story just related is apparently of no historical interest, and of modern origin, because Hemacandra does not relate it. It, therefore, need not longer detain us; but the Bhâdrabâhavî Saṃhitâ calls for further remark. A work of that name has been found by Dr. Bühler (Report on Sanskṛit Mss. 1874—1875. p. 20). He informs me that it is of the same character as the other Saṃhitâs, whereby its comparatively modern origin is proved. It is not cited by Varâhamihira, who names amongst his numerous authorities another Jaina astronomer, Siddhasena [1]) (Kern, Bṛihat Saṃhitâ, preface. p. 29). The Bhâdrabâhavî Saṃhitâ is, consequently, more modern than Varâmihira; at any rate, its author can not be the same Bhadrabâhu who composed the Kalpasûtra, because its last redaction, the date of which (980 A.V. = 454 A.D. or 514 A.D.) is mentioned in it, was already earlier than, or at least contemporaneous with, Varâhamihira — not to speak of its composition.

These are the statements of the Jainas about Bhadrabâhu, arranged chronologically. Whatever their historical value may be, they all show that he was unanimously looked upon by the Jainas as one of their oldest and most able authors. His works making part of, and having shared the fate common to, the whole Jaina literature, it will now be incumbent on us to discuss the questions concerning the Jaina literature in general. As its most eminent and sacred part are regarded the 45 Âgamas [2]). Some of them are attributed to authors, for instance the Daçâvaikâlika to Çayyaṃbhava, the Daçâçrutaskandha and Vyavahârasûtra to Bhadrabâhu, the Prajñâpanâ to Çyâmârya; but most of the âgamas

1) Siddhasena is a reputed Jaina author, who is said to have made the arrangement of the Saṃvat Era for king Vikramâditya. The Kalyâṇamandira stotra is attributed to him. (Ind. Stud. XIV, 376 sqq.)

2) The following list of the âgamas has been kindly furnished to me by Dr. Bühler. I Aṅgas: Âcârâṅga, Sûtrakṛidâṅga, Sthânâṅga, Samavâyâṅga, Bhagavatî, Jñâtadharmakathâ, Upâsakadaçâ, Antakṛiddaçâ, Anuttaraupapâtika, Praçnavyâkaraṇa. Vipâkasûtra: II Upâṅgas: Aupapâtika, Râjapraçna, Jîvâbhigama, Prajñâpanâ, Jambudvîpaprajñapti, Candraprajñapti, Sûryaprajñapti, Nirayâvalî. which includes the following upâṅgas, Kalpâvataṃsa, Pushpika, Pushpacûlika, and Vahnidaçâ. III Prakîrṇakas: Catuḥçaraṇa, Aturapratyâkhyâna, Bhakta, Saṃstâra Taṇḍulavaiyâlî, Candâvija, Devendrastava, Ganivija, Mahâpratyâkhyâna, Vîrastava. IV Chedas: Niçîtha, Mahâniçîtha, Vyavahâra, Daçaçrutaskandha, Bṛihatkalpa, Pâñcakalpa. V Nandîsûtra, Anuyogadvâra. VI Mûlasûtras: Uttarâdhyayana, Âvaçyaka, Daçâvaikâlika, Piṇḍaniryukti.

are said to have proceeded from the mouth of Mahâvîra. This statement is not to be understood as if Mahâvîra had actually composed the aṅgas, upâṅgas, etc.; but as they record what had been taught by him, he is regarded as their author. For authorship in India depended chiefly on the matter, the words being rather irrelevant, provided the sense be the same. That Mahâvîra was not the author of the Sûtras in our sense of "author", can easily be proved by those works themselves. For many Sûtras commence by relating that they were declared to Jambu by Sudharman. Most probably, the doctrines and words of Mahâvîra were, originally, not arranged into distinct works. But at Bhadrabâhu's time the eleven *aṅgas* existed already, for he explained them in separate works of his own; compare also the legend of Bhadrabâhu and Sthûlabhadra related above, where it is said that the saṅgha of Pâṭaliputra had collected the eleven *aṅgas*. Since that time the Sûtras must have undergone many alterations. That can be proved by the Sthânâṅgasûtra, which classes under *sthâna* 7 the seven nihnavas or schisms. They are also mentioned together with some details in the Âvaçyakasûtra. As the seventh nihnava happened in 584 A.V., it follows that even in the sixth or seventh century after Mahâvîra the Sûtras were liable to material additions [1]).

The ultimate redaction of the Jaina books was, according to the common and old tradition (see notes to K. S. § 148), made 980 A.V. by Devarddhigaṇin Kshamâçramaṇa [2]). The date 980 A.V. corresponds with 454 of our Era, on the supposition that at that time the Nirvâṇa was placed 470 before Vikrama. But if at that time the older tradition by means of which we have adjusted the date of the Nirvâṇa, was still in use, the corresponding year of our Era would be 514 A.D. Jinaprabhamuni and Padmamaṇdiragaṇin relate that when Devarddhigaṇin saw the Siddhânta i. e. 45 Âgamas on the verge of dying out, he caused it to be written in books by the saṅgha of Valabhî. Formerly, they say, teachers instructed their pupils *pustakânapekshayâ*, without having recourse to written books; but afterwards they used books, and so they do now when delivering their lessons in the *upâçrayas*. This vṛiddhasampradâya does not imply that Devarddhigaṇin was the first who reduced the sacred lore of the Jainas to writing, but it states only that ancient teachers relied

---

1) More modern works, such as the Ṭikâ of the Uttarâdhyayana, add to these *alpataravisaṃvâdinaḥ nihnavâḥ* another *bahutaravisaṃvâdî nihnavaḥ*, that of the Digambaras 605 A.V. The Digambaras say that the "Çvetâmbara utpatti" happened under Guptigupta, who was Thera saṃvat 36—46.

2) With this record agrees very well the fact that the Therâvalî of the Kalpasûtra and of the Ṛishimaṇḍalasûtra name as the last Thera Devarddhigaṇin, and the Therâvalî of the Âvaçyaka and Nandi Sûtras carry the list of the Theras down to him, but name him not; he is, therefore, supposed to have placed the Therâvalî at the head of the Nandi and Âvaçyaka Sûtras.

more on their memory than on written books[1]) as was generally the case in India. Devarddhigaṇin, the Buddhaghosha of the Jainas, has most probably arranged the whole of the traditional Jaina Literature, which he gathered in the Âgamas from books and from the mouth of living theologians. He was nearly too late for his task. For in many cases, fragments only of books were left, and he put them together to make up a book as he thought best. Under that supposition only can it be understood, why so many books consist of incoherent parts[2]). To the editor of the Jaina books their present arrangement is, most probably, due; he divided them into chapters, and introduced the method of counting the granthas (or çlokas i. e. 32 aksharas), the number of which, from hundred to hundred, or thousand to thousand, is inserted in the text at nearly the same places in all MSS. Those "milestones" were invented to guard the text against additions, for which purpose, however, they proved insufficient.

Even after Devarddhigaṇin the Jaina books were liable to many alterations. The various readings found in our MSS. are, it must be conceded, neither very important nor very numerous, except those which are caused by different systems of orthography. But it must have been different in a former period. For the commentaries mention a great number of pâṭhas which are not confirmed by our MSS. of the text. I am, therefore, inclined to believe that the text, which was adopted by most commentators of the work, and which is exhibited in the MSS. of the text only, is the recension of the oldest scholiasts. As far as the Kalpasûtra is concerned, I am convinced that such is the fact. The commentaries we have, are, directly or indirectly, based on the old *cûrṇis* or *vṛittis* written in Prâkṛit, which are now either lost or extant in very few copies only. Those oldest commentators must have found the text in great disorder, for they had to note down numerous *pâṭhas* many of which are mentioned by the later scholiasts. Some of them remark that they comment on one *pâṭha* only, for instance Devendragaṇin, who wrote a commentary on the Uttarâdhyayana. Others say that for all the *pâṭhas* one should have recourse to the cûrṇi, e. g. Jinaprabhamuni, the oldest commentator of the

---

1) About 80 years earlier, between 410 and 432 A.D., Buddhaghosha caused the Buddhist *piṭakas* and *arthakathâs* to be written down in books „for the more lasting stability of faith". As the redaction of the Buddhist works in Ceylon and that of the Jaina works in Guzerat occurred about the same time, it may be inferred either that the Jainas adopted that measure from the Bauddhas, or that it was in the 5th century that writing was more generally made use of in India for literary purposes.

2) Down to Devarddhigaṇin's time the Jainas must have handed down their sacred knowledge very carelessly indeed. For, eight generations after Mahâvira, a part of the „old" works was already forgotten, and less than ten generations later the whole of the pûrvas was lost. At least, such is the tradition.

Kalpasûtra whose work I have been able to procure. All that criticism can reasonably hope to achieve at present is, the reconstruction of the text which the first commentators have adopted. The text of Devarddhigaṇin's recension is, probably, beyond our reach.

From the unsettled state of the Jaina literature down to Devarddhigaṇin's times it may be concluded that the language also in which it was handed down, underwent a gradual alteration. The language which Mahâvîra and his immediate disciples, the Gaṇadharas, spoke, was, of course, the vernacular dialect of Magadha. For it is not likely that Mahâvîra used Saṃskṛit. But the Jaina Prâkṛit has very little affinity to the Mâgadhî either of Açoka's inscriptions or of the Prâkṛit Grammarians. Nevertheless it is called Mâgadhî by the Jainas themselves. In a half-stanza quoted by Hemacandra (Prâkṛit Grammar IV 287) it is said that "the old sûtra was, exclusively, composed in the language called Ârdhamâgadhî".

porâṇam addhamâgaha-
bhâsâ-niyaṃ havai suttaṃ ||

Hemacandra appends the remark that notwithstanding such is the old tradition, the Jaina Prâkṛit is not of the same description as the Mâgadhî, the peculiarities of which he is going to expound.

Before we proceed in our inquiry about the nature of the sacred language of the Jainas, it must be noticed that there are two varieties of language observable in their Prâkṛit. The older prose works are written in a language which considerably differs from the language of the commentators and poets. The latter entirely conforms to the rules which Hemacandra gives in the first part of his Prâkṛit Grammar for the Mâhârâshṭrî. But the Mâhârâshṭrî of Hemacandra is not identical with the Mâhârâshṭrî of Hâla, of the Setubandha, and of the dramas. Two of the most conspicuous differences are the use of dental *n* if initial or doubled, and of the *yaçruti*. The *Jaina Mâhârâshṭrî*, as it may be appropriately called, has been accurately described by Hemacandra, as will be evident to every one who reads one of the modern Jaina compositions, e. g. the Kâlikâcâryakathâ. [1])

The language of the older Sûtras, which I shall call *Jaina Prâkṛit*, differs from the Jaina Mâhârâshṭrî in many points. Thus the Jaina Mâhârâshṭrî generally forms the nominative of the masc. in *o* and the locative in *mmi*, while the Jaina Prâkṛit has *e* and *msi*, e. g. J. M. *Sakko*, J. P. *Sakke*, Saṃskṛit *Çakraḥ*; J. M. *varaṃmi*, *moḳṃmi*, *sâhummi*, J. P. *varaṃsi*, *kucchiṃsi*, *sâhuṃsi*. The indeclinable past participle in J. M. commonly ends in *ûṇaṃ*, *ûṇa* or *uṃ*, while in the older language it ends in *ittâ* or *ittâ*

1) I hope soon to publish the text ot this curious legend, which seems to contain traces of genuine historical tradition.

ṇaṃ, e. g. J. M. *kâûṇaṃ, nâûṇaṃ, gaṃtûṇaṃ, kâûṇa, kâuṃ*, etc., J. P. *karittâ jâṇittâ, gacchittâ* or *karittâ ṇaṃ*, etc. The Jaina Prâkṛit has preserved the aorist, while the Jaina Mâhârâshṭrî usually substitutes the past participle for it. Besides these more general differences, there are in Jaina Prâkṛit many archaic words, forms, and phrases which are discarded in Jaina Mâhârâshṭrî.

About the nature of *Jaina Mâhârâshṭrî* there can be little doubt, as we have the express statement of Hemacandra. It is, on the whole, the same language as the Mâhârâshṭrî of Hâla. The differences can be accounted for by the supposition of a difference in the local origin. I believe that the Jaina Mâhârâshṭrî nearest approached the language of Surâshṭra, because the edition of the Jaina scriptures, according to tradition, took place in Valabhî, as related above. It might therefore more appropriately be called Jaina Saurâshṭrî. But as it shares the general character of the Prâkṛit commonly called Mâhârâhshṭrî, and as it is thus called by Hemacandra, I dare not introduce a new name.

The nature of the *Jaina Prâkṛit* is also not difficult to make out. Seeing that it is on the whole the same language as the Jaina Mâhârâshṭrî, from which it differs merely by the retention of archaic forms, we may justly look upon it as an older or archaic Mâhârâshṭrî. Hemacandra calls it *ârsham*, the language of the Ṛishis, and treats it together with the Jaina Mâhârâshṭrî, noting forms peculiar to it as exceptions from the general rules, and saying that, in general, rules which are binding for the common Prâkṛit, may optionally be followed in the language of the Ṛishis (I, 3). Thereby he shows his belief, that the Jaina Prâkṛit more closely resembles the Mâhârâshṭrî than any of the other Prâkṛits. His testimony is of great weight, because it is given in opposition to the popular opinion by one who knew Prâkṛit thoroughly. The only Mâgadhism which Hemacandra discovered in Jaina Prâkṛit is, the nominative singular in *e* formed from masculine bases in *a;* and I have not been able to discover any other [1]).

1) Prof. Weber maintains that the changes of *ry ṛj dy* to *yy*, and of *kṣh* to *khk* prove that Jaina Prâkṛit is Mâgadhî. But the graphical signs which he has interpreted as *yy* and *khk*, viz. ज्ञ and ख्क, are the signs for *jj* and *kkh*. They are used in the Jaina Mâhârâshṭrî as well as in the Jaina Prâkṛit, and as they have decidedly the value of *jj* and *kkh* in the former, they must have the same in the latter. For if Hemacandra had read them differently in the Jaina Prâkṛit, he would have stated it as an exception to the rules I, 89 and 90. Again, when he lays down the rules that the Çaurasenî may change *ry* to *yy* (IV, 266), and that Mâgadhî substitutes *y* for *j, dy, y* (IV, 292) and ⟩⟨ *K* for *kṣh* between vowels (IV, 296), he would certainly have remarked that the *ârsham* had the same peculiarities, if he had read the signs in question in the same manner as Prof. Weber proposes. For the palaeographical explanation of the signs

In nearly all cases where the Çaurasenî and the Mâgadhî differ from the common Prâkṛit, the Jaina Prâkṛit conforms to the latter, except in the instance quoted above, and two more. Hemacandra (IV, 264, 265. IV, 278) prescribes for the Çaurasenî (and Mâgadhî) the nominatives and vocatives *bhayavaṃ* and *maghavaṃ* for *bhagavân*, *bhagavan* and *maghavân*, *maghavan*, and the form *tâ* for *tasmât*. These forms occur also in the Jaina Prâkṛit. These instances of coincidence of the Jaina Prâkṛit with other Prâkṛits than Mâhârâshṭrî are few and unimportant, compared with those in which it conforms to the common dialect. I, therefore, do not hesitate to declare the Jaina Prâkṛit to be Mâhârâshṭrî, as has already been done by Chr. Lassen in his Institutiones linguae Praeriticae p. 42. In those cases in which Jaina Prâkṛit differs from the Mâhârâshṭrî, it has usually retained the older forms. A trace of a still older phase of the language has been noticed above p. 4., it is the optional insertion of a vowel which is always inserted in the written language between two consonants incapable of assimilation. This freedom which is required for the scanning of Prâkṛit verses in the old sûtras, and which has some resemblance to the practice of the Vedic poets, is no more allowed by the later Prâkṛit poets. In their compositions, every vowel must necessarily be pronounced as one syllable. The difference between the practice observed in works like the Setubandha, the Saptaçataka, the later Prâkṛit stotras, etc., and that in the older metrical sûtras, can only be explained by a change of the language similar to that of the Vedic idiom to classical Saṃskṛit [1]).

As yet we have only traced the gradual development of the language in the sacred writings of the Jainas. But some of its irregularities are of a different kind. They seem to show that the dialect was originally different from that in which the sûtras are written. Thus the *e* of the nominative masculine is, most probably, preserved from the original Mâgadhî, which was, as I have pointed out above, the language of Mahâvîra and his Gaṇadharas. To sum up, the language of the Jaina writings has not

---

क्ख (older forms of which are ख्ख and ख्ह) and ज्झ, it should be kept in mind, as Dr. Bühler tells me, that the Jainas, in combining their letters, usually place the second letter below, and not behind, the first. The former signs will readily be recognised as gradual simplifications of ख्ह, and in the latter the old form of *j*, ज्, catches the eye. In the text of the Kalpasûtra, I have, accordingly, transcribed the groups in question by *kkh* and *jj*.

1) The optional insertion of a vowel, chiefly before *y* and *v*, in the Vedas, was entirely rejected in the later Saṃskṛit, while the insertion of the vowel which is optional in the Jaina Prâkṛit, became the rule in the later Prâkṛit, provided the group of consonants was not assimilated.

been fixed before the final rearrangement of the Jaina books. Originally a popular dialect, it was naturally adapted by those who handed down orally the sacred lore, to the dialect current at their time and in their country. As the idiom of Mahârâshṭra seems to have ranked, during the early centuries of our Era, foremost amongst the vernacular dialects of India, because the Grammarians treat it as the standard of all Prâkṛits, and because it possessed a large literature, of which considerable specimens are still extant, it will not be astonishing that the Jainas yielded to its influence, and when reducing their sacred books to writing, shaped their language according to it. Such a change of language, even in written books, is not without a parallel in the history of literature, for I have already adduced above p. 4. a similar change of the German language, due to the copists, in the compositions of the middle ages. The editor of the Jaina scriptures did not choose to adopt the Mâhârâshṭrî with all its peculiarities, but he retained many archaic forms which were, probably, sanctified by long tradition. For an archaic language has always been considered peculiarly fitted for a serious style.

The Jaina Mâhârâshṭrî, being once fixed as a sacred language, continued to be the literary language of the Jainas until it was replaced by Saṃskṛit. All the old commentaries, the *cûrṇis* and *vṛittis*, and a great many independent compositions, were written in Prâkṛit. Between 1000 and 1100 A.D., the Jainas adopted Saṃskṛit as their literary language. But the change was neither a sudden, nor a complete one. For Saṃskṛit poems by Jaina authors previous to that period, such as the Bhaktâmara stotra, the Kalyâṇamandira stotra, the Çobhanastutayas, are still extant, and Prâkṛit works were composed later than the twelfth century, e. g. the Paryushaṇâkalpaniryuktivyâkhyâna by Jinaprabhamuni (saṃvat 1364) and a great many Prâkṛit stotras.

Before I leave the present topic, I must call attention to the orthography of the Jaina books. In general, all manuscripts follow the same system, but in the following points they are at variance with each other.

1) The *yaçruti* is used in some manuscripts only after *a* and *â*, in other MSS. also after *i*, *î*; *u*, *û*; *e*, *o*. Hemacandra prescribes, in his Grammar I, 180, the *yaçruti* after *a* and *â*, but in the commentary, he says that it is occasionally seen elsewhere also. His rule is partly confirmed by our MSS. For the *ya* and *yâ* always occur after the *a* and *â*. But many MSS. write the *ya* and *yâ* after all vowels. Both ways of spelling are found in very old and very good MSS. It is, therefore, impossible to decide which is the more correct one. From an etymological point of view, it is more self-consistent that the *yaçruti* should be written after all vowels, because it is the remnant of a lost

consonant[1]). I have, therefore, retained it in the present edition of the Kalpasûtra.

2) Some MSS. change *e* and *o* before two consonants to *i* and *u*. This is due to the absence of signs for the short *e* and *o* in the Devanâgarî alphabet, whence the following dilemma arose. If *e* or *o* was written, the quantity of the vowel was neglected, for a vowel preceding two consonants is always shortened, and *e* and *o* are signs of long vowels. If, on the contrary, *i* or *u* was written, the quality of the sounds *ĕ* or *ŏ* was insufficiently rendered. I have written *e* and *o* when the Saṃskṛit prototype has the diphthong.

3) Some MSS. write *nn*, while others prefer *ṇṇ* (see Hem. I, 228.). I have usually adopted the spelling of the majority of the best MSS. in each case.

4) Occasionally, initial *ṇ* is written in some MSS., compare Hem. I, 229.

5) Whether a consonant between two vowels should be retained, or be replaced by its substitute, or be dropped, seems to have been left to the choice of the transcriber of the Jaina books.

6) One MS. of the Kalpasûtra (India Office Library 1599.) writes *bb* for *vv*, and *b* for *v* initial in single and compound words, e. g. bibaddhaṇa for vivaddhaṇa, Mahabîra, etc. This peculiarity is probably due to the fact that the MS. was written in Eastern India.

7) The letters उ and ऊ (*u* and *o*) are frequently interchanged. But this has no reference to the sound, because *u* and *o* are never interchanged when preceded by a consonant, except, of course, in the case under 2). The MSS. A and B of the Kalpasûtra very seldom make mistakes about the signs in question.

The diversity of orthography just described is, perhaps, due to different grammatical schools. I have carefully noted, below the text of my edition, all various readings, except those which fall under heads 6 and 7. But I have, nevertheless, not been able to decide which are the oldest and most authentical spellings. Having examined a good many paper MSS., I am convinced that they will not give us the clue to the correct orthography of Jaina Prâkṛit; an examination of the oldest MSS., written on palm leaves, will, perhaps, lead to a more satisfactory result. But I think it more probable that there never was one fixed system of orthography adhered to by all Jaina writers of any time. For other Prâkṛits also, e. g. that of the cave inscriptions and the vernacular dialects of modern India, frequently spell the same words in different ways.

---

1) In the Prâkṛit inscriptions of the caves in Western India, *y* is the substitute of *j* before *i* also, e. g. *pavayitikâ* and *pavaïtikâ* = *pravrajitikâ*.

After having given such information about the general questions connected with Jainism and its literature, as I was able to gather, I shall now discuss the Kalpasûtra in particular. That work does not belong to the Âgamas or sacred books of the Jainas. It is even pronounced by the Digambaras te be a forgery (see Indian Antiquary) because it contains the account of Mahâvîra's having entered the womb of Devânandâ before he was placed in that of Triçalâ, which the Digambaras deny to have been the case. But as the same story is also related in the Âcârâñga and Âvaçyaka Sûtras, it seems to be very old, and consequently the criticism of the Digambaras falls to the ground. With the Çvetâmbaras the Kalpasûtra is a great authority, and is always read publicly during the varshâvâsa or Pajjusan.

The Kalpasûtra is supposed to be the work of Bhadrabâhu. He is said to have found the materials for it in the ninth pûrva, called Pratyâkhyânapravâda, as we learn from the following passage of its commentary called Kiraṇâvalî.

praṇetâ tâvat sarvâksharasaṃnipâtavicakshaṇaç caturdaçapûrvavid yugapradhânaḥ çrîBhadrabâhusvâmî daçâçrutaskandhasyâ 'shṭamâdhyayanarûpatayâ pratyâkhyânapravâdâbhidhânanavamapûrvât Kalpasûtram idaṃ sûtritavân. "But the author was the yugapradhâna Bhadrabâhusvâmin, who was well versed in the combination of all letters (see note to § 138), and knew the fourteen pûrvas. He composed this Kalpasûtra as the eighth chapter of the Daçâçrutaskandha, by extracting it from the ninth pûrva called Pratyâkhyânapravâda".

The statement of the Kiraṇâvalî, which is repeated by other commentators, that the Kalpasûtra is called Paryushaṇâkalpa, and forms the eighth chapter of the Daçâçrutaskandha, is erroneous and has been caused by a wrong interpretation of the last words of the Kalpasûtra itself. Rightly understood, they prove that it applies only to the last part, the Sâmâcârîs, or rules for yatis. For at the end of the Kalpasûtra it is said that Mahâvîra "thus pronounced, thus enunciated, thus declared, thus explained the (eighth) chapter called Paryushaṇâkalpa". These words can only have reference to the Sâmâcârîs, because the Jinacaritra and the Sthavirâvalî cannot be expected to have been related by Mahâvîra. For the former mentions events which happened after his death, and the second part exclusively refers to the history of Jainism after Mahâvîra. Besides, those parts have no relation to the Paryushaṇâ or varshâvâsa. They have, therefore, no claim to the title Paryushaṇâkalpa, and cannot, consequently, be regarded as having, originally, made part of the eighth chapter of the Daçâçrutaskandha. The natural consequence of the preceding deduction is, that the Sâmâcârîs only, being comprised by the name Paryushaṇâkalpa, and forming the eighth chapter of the Daçâçrutaskandha, can be looked upon as the work of Bhadrabâhu. It is self-evident

that the Sthavirâvalî, which extends to many generations beyond Bhadrabâhu, was not composed by him. Nor is the Sthavirâvalî the work of one author only. For the saṃkshiptavâcanâ and the vistaravâcanâ of the Sthavirâvalî, i. e. the short, and the more detailed list of Theras, must, originally, have been independent from each other, because of their stylistic and material differences. At the end of these Sthavirâvalîs, which, originally, I presume included the last Daçakevalin, Vajra and his pupils, only, a number of gâthâs are added which give the names of the Theras from Phalgumitra down to Devarddhigaṇin. In some copies of the Kalpasûtra, a prose version of these gâthâs has been inserted before them. It is apparently a modern addition, because it is omitted in many MSS., and because the oldest commentator already notices this variation of the text. Besides, the eleventh "century" (grantha 1000—1100) excedes, decidedly, the prescribed extent, to which it will be reduced by the rejection of the chapter in question. Finally, the first two paragraphs of the Sthavirâvalî are independent of the rest, and once formed, I believe, a part of the Jinacaritra. We can, therefore, recognise in the Sthavirâvalî four or five distinct treatises.

The Jinacaritra, possibly, may be the work of one author, though I believe Dr. Stevenson to be right in his conjecture, that the original ended with the life of Mahâvîra (Kalpasûtra p. 99). But this part has most probably been enlarged by other additions besides those pointed out by Dr. Stevenson. I mention only the description of the fourteen dreams, which differs entirely from the archaic style of the bulk of the work, by its many long and complicate compounds peculiar to a comparatively modern phase of Indian poetry. It needs hardly be remarked that the passages containing the dates 980 and 993 A.V. do not refer to the author, but to Devarddhigaṇin, the editor of the Kalpasûtra. The archaic style in which the Jinacaritra is composed, and which it has in common with the old sûtras written in prose, does not speak against Bhadrabâhu's authorship. But this question must be left undecided for want of direct proof.

The Jainas seem to have been perfectly aware of the disparity of the subjects treated in the Kalpasûtra. But they account for it by saying that the first two parts are prefixed to the Paryushaṇâsâmâcârîs *maṅgalârtham*, i. e. for the sake of auspiciousness. Thus we read in the Paryushaṇâkalpaniryukti,

purima-carimâṇa kappo
u maṃgalaṃ Vaddhamâṇa-titthammi |
to parikahiyâ Jiṇa-pari-
kahâ ya therâvalî c'ettha[ṃ]. ‖ 61 ‖

"And the religious practice of the first and the last (Jinas) is auspicious during the *tîrtha* of Vardhamâna. Hence the stories of the Jinas, and the list of the Theras, have been told here".

The later scholiasts have converted this gâthâ into a metrical table of contents (adhikâratrayam) by altering the last hemistich.

purima-carimâṇa kappo
maṃgalaṃ Vaddhamâṇa-titthammi |
to parikahiyâ Jiṇa-gaṇa-
harâi-therâvali-carittaṃ ||

"The religious practice of the first and the last (Jinas) is auspicious during the *tîrtha* of Vardhamâna. Hence the Jina (caritra), the list of the Theras beginning with the Gaṇadharas, and the caritra, i. e. paryshaṇâsâmâcârîs, have been told".

The Jinacaritra, the Sthavirâvalî, and the Sâmâcârîs, united in one book under the title of Kalpasûtra, were, according to the tradition, included in Devarddhigaṇin's recension of the Jaina scriptures, though it is not contained in the Siddhânta. Two arguments speak for the correctness of the tradition: firstly the date of that event is incorporated in the Kalpasûtra; secondly the whole of the Kalpasûtra is divided into "centuries" of one hundred granthas (32 aksharas) each, a measure adopted, probably, by the editor in order to guard the text against additions. These centuries are marked in the text as यं १००, यं २०० etc., and are to be found in all MSS. at the identical places. The Kalpasûtra is said to contain 1216 granthas, e. g. in the following verse taken from the colophon of MS. A.

ekaḥ sahaçro (!) dviçatî-sametaḥ
çlishṭas tataḥ shoḍaçabhir vidantu |
Kalpasya saṃkhyâ kathitâ viçishṭâ
viçâradaiḥ paryushaṇâbhidhasya ||

In the present day it is commonly known as the "Bâr sem sûtra" i. e. the sûtra of twelve hundreds.

Our present text contains, according to my calculation, more than 100 granthas above the fixed number, and the extent of the several centuries varies between 100 and 135 granthas. It is rather tempting to reduce the text to its original extent by rejecting suspicious passages. But I have refrained from doing so, because the loose style of the Kalpasûtra with its many repetitions which are peculiar to the Sûtra style, render it impossible to point out exactly those passages which are spurious.

Formerly, it is said, the whole Kalpasûtra was read on the first night of the Pajjusaṇ. But since it was read in the sabhâ of Dhruvasena, king of Ânandapura, to console him after the death of his beloved son Senâṇigaja,[1]) the Kalpasûtra was explained in nine vâcanâs. These nine vâcanâs or vyâkhyânas are marked in some MSS. and in some commentaries. But as there is no agree-

1) There is no agreement about the date of this event; some place it in 980 A.V., others in 993, and others again in 1080, see notes to § 148.

ment on this head, I have not introduced the division into vâcanâs in my edition. Usually, the live of Mahâvîra is divided into six vâcanâs, whilst the rest of the Jinacaritra makes up the seventh vâcanâ; or the life of Mahâvîra contains five vâcanâs, and the rest of the Jinacaritra two. The Therevalî and the Sâmâcârîs are reckoned as one vâcanâ each [1]).

An other subdivision of the text is that into sûtras or paragraphs, which is exhibited in most MSS. in the Jinacaritra and the Sâmâcârîs. It is most probably due to the scholiasts, who always use it; for the Therâvalî, being not commented upon, is not divided into sûtras. This arrangement is not exactly the same in all MSS. and commentaries. But they differ not very much so that it will be easy to identify a sûtra of our text in the MSS. The division of the Therâvalî into 13 paragraphs is of my own making, as the MSS. do not subdivide it.

The oldest commentary on the Kalpasûtra, which, however, I have not seen, seems to have been the Cûrṇi. It was, like all Cûrṇis, written in Prâkṛit, as is proved by occasional quotations from it in the commentaries. The name of its author is not mentioned. But he is always spoken of as the Cûrṇikâra. All later commentaries are, directly or indirectly, based on the Cûrṇi, and are, most probably, for the greater part translations of it into Saṃskṛit. For they agree, nearly verbally, in most of their explanations, a fact which can only be accounted for by our assuming that all commentators drew from the same source. And as all of them mention the Cûrṇi as their highest authority, we must, naturally, look upon that work as the basis, nay the original, of all commentaries. The more modern commentators have inserted legends from the Ṭîkâs of the Uttarâdhyayana and Âvaçyaka Sûtras, and, occasionally, add lengthy digressions.

The oldest commentary I have used is the Pañjikâ, called Saṃdehavishaushadhi. It was written by Jinaprabhamuni, who completed his work in Ayodhyâ, Âçvina su. di. 8, saṃvat 1364 or 1307 A.D. [2]). The author has commented in the same work on the Paryushaṇâkalpaniryukti also, a small treatise on the Paryu-

1) The distribution of the vyâkhyânakas in MS. E is given there as follows, purima-carima-gâthâ çakrastavaṃ yâvat, çakrastavagarbhâvatârasaṃcâraḥ, svapnavicâragarbhasthâbhigraho, janmotsavakriḍâçriVirakuṭumbavicâraḥ, dikshâjñânaparivâramokshâḥ, çrîPârçvanâthaçriNemicaritântarâṇi, çrîÂdinâthacaritra-Sthavirâvalyaḥ, sâmâcârimichâ (?), çrî Kâlikâcâryakathâ. — The Kâlikâcârya-kathâ is an independent legend, its addition to the Kalpasûtra is, therefore, quite modern. In the enumeration of the vâcanâs, given above, the life of Âdinâtha or Ṛishabha, and the Therâvali, are contracted into one vâcanâ. By counting both parts as one vâcanâ each, and by omitting the Kâlikâcâryakathâ, we arrive at the usual distribution of the vâcanâs.

2) I subjoin his own words.

Vaikrame strikalâviçvedevasaṃkhye tu vatsare |
mahêshṭamyâm ayam puryâm Ayodhyâyâṃ samarthitaḥ ‖

shaṇâ, in 66 Prâkṛit gâthâs. The commentary on this work has been compiled from the Niçîthacûrṇi, as the author states, and it is written in Prâkṛit, except a few short passages in Saṃskṛit. This curious fact illustrates best how much of their own Jaina authors added to the work of their predecessors. Had there been already a Saṃskṛit commentary on the Paryushaṇâniryukti, our author would certainly have copied it. But being left to his own resources, he made extracts from the Niçîthacûrṇi, without even taking the trouble of translating them into Saṃskṛit. We may be convinced that a Saṃskṛit commentary on the Kalpasûtra existed in Jinaprabhamuni's time, because he explains that work in Saṃskṛit, and does not give an abstract of the Cûrṇi. My manuscript of this commentary, for which I am indebted to the liberality of Dr. Bühler, was finished saṃvat 1674. Extracts from it, and various readings mentioned in it, are marked in the notes by S.

The next three commentaries differ very little from the preceding one in the explanation of the text. But they contain, besides an introduction, a good many legends and extracts from other works. They do not comment upon the Paryushaṇâkalpaniryukti. These are, —

1) The Subodhikâ by Vinayavijaya, saṃvat 1616. This commentary contains 5400 granthas. The MS. I used belongs to the Bombay collection.

2) The Kiraṇâvalî, or Vyâkhânapaddhati, by Dharmasâgara, saṃvat 1628, granthas 7000. — Bombay.

3) The Kalpalatâ by Samayasundara. The date is not given, but it may be inferred from the author's statement, that Jinacandra, the guru of his own guru Sakalacandra, lived under Akbar. This commentary is perhaps not the Kalpalatâ the introduction of which Dr. Stevenson pretends to translate. A MS. of the Kalpalatâ has kindly been lent to me by Dr. Bühler. It contains 7700 granthas, text and commentary, and bears the date, saṃvat 1699.

More modern works, and of less value, are, —

4) The Kalpadruma by Lakshmîvallabha. Each sûtra is followed by a Saṃskṛit translation. The legends found in other commentaries make up the greater part of the work. At the end of the commentary on the Kalpasûtra is added the story of the Kâlikâcâryas. A MS. of the Kalpadruma is in my possession, it is very bad and modern, saṃvat 1903.

5) An interlineary version, or Ṭabâ, of the Kalpasûtra by an anonymous writer. The legends, and a Guzerati explanation of the dreams, are inserted at their proper places. This commentary is contained in my MS. marked C. It was written by Abhayasundaramuni (perhaps the author?) saṃvat 1761.

6) An interlineary version, or Ṭabâ, without legends etc. It is found in the MS. belonging to the India Office library, No. 1599. This is the MS. which Colebrooke used in making his abstracts.

Besides these works, which I have examined and, occasionally, used, the following should be mentioned.

7) The Kalpapradîpikâ by Vijayatilaka, saṃvat 1681, granthas 4500. I have seen a MS. of this commentary belonging to Dr. Bühler.

8) The Çâkhâbadha by Yaçovijaya. It is mentioned by Dr. Stevenson, the Kalpasûtra, preface, p. IX.

9) The Kalpasûtraṭikâ. See Dr. Bühler, *Report on Sanskrit MSS. 1872—1873.*

10) An anonymous commentary contained in a MS. of the Berlin collection (Ms. or. fol. 638). It is a very carelessly written MS., and proved of no use. Saṃvat 1759.

In the notes, I have given chiefly extracts from the Saṃdehavishaushadhi. I had first made extracts from the Kiraṇâvalî and the Subodhikâ, but on receiving the Saṃdehavishaushadhi, I preferred to give the explanations in the words of the oldest commentator.

A translation of the Kalpasûtra has been published by the Rev. Dr. Stevenson [1]). This work, which for a long time has been almost the only, and the standard, publication on Jainism, is, I regret to say it, neither accurate nor trustworthy. In the first instance, it is not what it pretends to be, a translation of the text, but, for the greater part, a carelessly made abstract. The first part has, on the whole, been rendered more faithfully than the more difficult Sâmâcârî portion. In the former chapter, Dr. Stevenson does not leave out any considerable portion, but wherever the text presents difficulties, he paraphrases instead of translating. In the Sâmâcârîs, the case is, however, different. There large portions have been left out, or given in a condensed form, and the meaning has rarely fully been made out [2]).

1) The Kalpa Sútra and Nava-Tatva (sic), two works illustrative of the Jain Religion and Philosophy. Translated from the Mágadhi. With an appendix containing remarks on the language of the original. By the Rev. J. Stevenson, D.D., V.P.R.A.S. Bombay. London etc. 1848.

2) I put side by side the translation of the sixth sâmâcârî, as made by me, and as given by Dr. Stevenson.

My translation.

During the Paŋjusan a collector of alms might ask (the âcârya), 'Sir, is anything required for the sick man?' and he (the âcârya) might say, "Yes" He (the sick man) should then be asked, 'How much do you require?' And he (the âcârya) will say, "Thus much should be given to the sick man. You must take no more than he (the sick) has demanded". And he (the collector of alms) should beg, and begging he should accept (the required food.) Having

Dr. Stevenson's translation.

Certain sages having asked for direction in the matter, it was laid down as a rule that in feeding a sick man you are only to take what food he may not require, if you have the Superior's permission.

It would be unjust to judge Dr. Stevenson by the standard which must now be applied to editions and translations of Saṃskṛit and Prâkṛit works, as thirty years ago Oriental studies were in their earliest infancy, and philological accuracy was not so much thought of as nowadays. Dr. Stevenson was a pioneer on his field of research, who worked with great enthusiasm and indefatigable zeal. It is to be regretted that his want of philological training, [1]) and his theological turn of mind, have prevented that his results should be proportionate to the labour expended. As the case stands, I can only warn all Orientalists against using his Kalpasûtra.

The present edition of the Kalpasûtra is based on the following MSS.

A. An excellent MS. in my collection. It is written with silver on 113 leaves, most of which are painted alternatively black and red. Each page contains six lines. There are many pictures in the text, and arabesques on the margin. (MSS. of this kind are not unfrequent with the Jainas.) The date, Vikrama 1484 (1427 A.D.) is given in the somewhat lengthy colophon. No subdivisions, neither sûtras nor vâcanâs, are marked in this MS. The description of the dreams given in it differs from the common one, and is evidently not the original one, as is proved by the absence of the

---

obtained the quantity ordered, he should say: 'No more!' Perchance, (the giver of food might ask), "Why do you say so, Sir?" (then he should answer), ('Thus much) is required for the sick man'. Perchance, after that answer, another might say, "Take it, Sir! You may after (the sick man has been fed) eat it or drink it". Thus a man is allowed to collect alms, but he is not allowed to collect alms by pretending that it is for a sick man.

1) That Dr. Stevenson's knowledge of Prâkṛit was very limited can easily be proved by the remarks he makes on the Mâgadhî. He alledges (p. 141) that तिसलाए and माहणीए are nominative forms; p. 142 he spells locative forms, *kucchimsi* and *samaṇaṃsi* कुछम्सि (sic) and श्रमणम्सि and the indeclinable past participle *pâsittâ ṇaṃ* पाशिताणं. His proficiency in Saṃskṛit may be judged by comparing his translation of a passage from the Kalpalatâ (p. 13) with that given above p. 22. I subjoin Dr. Stevenson's translation. 'I am now to mention the author of the Kalpa-Sûtra. He was Sri Bhadra Báhu Svámi, an accomplished teacher who was well acquainted with the fourteen branches of his subject, (note; In the original पूर्व) and an accomplished teacher. Taking for his guide the works here named — the Daśaśrutaskandha, Ashtamádhyáyana, and the discourse called Pratyákhyána, in which he found nine branches — he composed the Kalpasútra'.

mark ॐ २०० which ought to stand in the beginning of the part in question.

B. A very good MS. in my collection, fols. 80 of 9 lines. It contains many pictures illustrating the text. The date of its completion is given at the end, samvat 1521, Âçvina su. di. 11, on a Tuesday. The sûtras are sometimes numbered, but not throughout.

C. A fair MS. in my collection, saṃvat 1761. It contains the Ṭabâ mentioned above. (5.)

E. A rather carelessly written MS. in the Berlin collection, MSS. or. fol. 647. It contains, besides the text, the Kalpântarvâcyas i. e. legends.

H. A modern MS. in the India Office Library, No. 1599. It contains the Ṭabâ mentioned above. (6.) No date.

M. A modern MS. in the Bombay collection. It contains the commentary called Kiraṇâvalî.

Besides these MSS., I have examined, but not collated, the following, —

1) A MS. of the text and the Kalpalatâ by Samayasundara. In Dr. Bühler's collection.

2) A carelessly written but not very incorrect MS. in the Bombay collection. No date, perhaps 150 or 200 years old.

3) and 4). Two modern MSS. in the Bombay collection, containing the text of the Jinacaritra and the Sthavirâvalî only.

5) A MS. in my collection, containing the text and the Kalpadruma. Very inaccurate, saṃvat 1903.

6) A modern and very inaccurate MS. in the Berlin collection, MSS. or. fol. 638. It contains an anonymous commentary. Saṃvat 1759.

The MSS. 2—6, being rather carelessly executed, have proved of no value. I have, therefore, not given the various readings found in them, in the already numerous footnotes.

As regards the system of transcription, it should be kept in mind that each vowel forms a separate syllable. As the Jaina Prâkṛit has no diphthongs, diacritic signs employed by other scholars are not required. The interpretation of Prâkṛit texts presenting numerous difficulties, I have thought it expedient to separate the parts of compounds. As in some Jaina MSS. the signs | and || are used for punctuation, to a far greater extent than, but with as little consistency as, in Brahminical MSS., I have made a moderate use of our system of punctuation.

Supplementary note.

I have, throughout the introduction, taken account of the tradition of the Çvetâmbaras only. The Digambaras have a tradition of their own, which differs considerably from that of the other sect. I know it from a modern Gurvâvalî lent to me by Dr. Bühler. It is written in Jepur, in the dialect of that town, and explains a number of gâthâs the Prâkṛit of which shows remarkable affinity to the Çaurasenî. In this Gurvâvalî, two Bhadrabâhus are mentioned. Bhadrabâhu I. died 162 A.V., he was the last of the çrutakevalins. Bhadrabâhu II. was Thera 492—515 A.V. He was the disciple of Yaçobhadra, who was the disciple of Subhadra (468—474 A.V.). In Subhadra's second year, i. e. 470 A.V., Vikrama was born. This is confirmed by the following hemistich quoted in the Gurvâvalî.

sattari-cadu-sada-jutto
tiṇa kâlâ Vikkamo havai jammo

The Saṃvat Era, however, does not date from the janman, but from the râjya of Vikrama, or from the 18th year after his birth[1]). Thus the year 492 A.V. is made to correspond with saṃvat 4, the date of Bhadrabâhu. From Bhadrabâhu II. down to saṃvat 1840, a continuous list of Theras is given, which looks as if based on genuine tradition.

According to the Gurvâvalî, the whole of the aṅgas was lost after Pushpadanta (633—683 A.V.). He reduced the sacred lore to writing. The year of his death (683 A.V.) is also given for the birth of Vikrama.

1) According to the statements made above, the Eras of Mahâvîra and Vikrama would be separated by 488 years; hence the Nirvâṇa would fall in 545 A.D. This date is separated from that of Buddha's Nirvâṇa, according to the chronology of Ceylon, by two years only.

KALPASÛTRA

(Jinacaritra, Sthavirâvalî, Sâmâcârî).

Jinacaritra.

NOTES.

I. Jinacaritra.

1) paryushaṇâkalpasya câ "dau keshucid âdarçeshu maṅgalârtham pañcanamaskâro dṛiçyate (Saṃdehavishaushadhi). This maṅgala is found in a good many Jaina works besides the Kalpasûtra.

atra ca adhyayane trayaṃ vâcyaṃ: jiṅânâṃ caritâni, sthavirâvalî, paryushaṇâsâmâcârî. S. „

Sûtras 1 and 2 down to: *cue 'mi tti jâṇai* are copied almost literally, from the Âcârâṅgasûtra.

paṃcahatthuttare. I take this word to be a madhyamapadalopî bahuvrîhi compound: pañca kalyâṇakâni uttaraphalgunyâṃ yasya sa.

aṇaṃte ityâdi: anantam anantârthavishayatvât; anuttaraṃ sarvottamatvât; nirvyâghâtaṃ kaṭakuṭyâdibhir apratihatatvât; nirâvaraṇaṃ kshâyikatvât; kṛitsnaṃ sakalârthagrâhakatvât; pratipûrṇaṃ sakalasvâṃçasahitatvât paurṇamâsîcandramaṇḍalavat; *kevalavaranâṇadaṃsaṇe tti.* kevalam asahâyam ata eva varaṃ jñânaṃ darçanaṃ ca, tataḥ prâkpadâbhyâṃ karmadhârayaḥ. tatra jñânaṃ viçeshâvabodharûpaṃ darçanaṃ sâmânyâvabodharûpam. S.

2) The year of the Jainas is divided into the old triple seasons, *grîshma*, *varsha* and *hemanta*, each of which contains four lunar months. The year commenced on Caitra su. di. 1, as is proved by § 208.

mahâvijaye 'tyâdi mahân vijayo yatra tathâvidhaṃ ca tat pushpottaraṃ ca pushpottarasaṃjñakaṃ ca tad eva pravareshu çreshṭheshu puṇḍarîkaṃ vimânânâm madhye uttamatvât. S. (see Colebrooke Misc. Essays II 199). âyur devâyushkam, bhavo devagatiḥ, sthitir âhâro vaikriyaçarîre 'vasthânaṃ, teshaṃ kshayeṇa. S.

3) *cayamâṇe na jâṇai.* the Âcârâṅgasûtra adds: *suhume ṇaṃ se kâle pannatte.* Only Tîrthaṃkaras and Gods know about their 'fall'. There is apparently a contradiction in the words *tinnâṇa* and *na jâṇai* which the commentators have not remarked.

suttajâgara tti suptajâgarâ nâ 'tisuptâ nâ 'tijâgratî, ata evâ "ha *uhîramâṇî* 2 vâraṃ vâram îshan nidrâṃ gacchantî. S.

The sandhi rules are frequently neglected in the commentaries. I have not changed their orthography except as regards the anusvâra which stands for all nasals before consonants and for *m* at the end of a sentence, and the doubling of consonants before *r*.

4) This gâthâ is taken from the Âvaçyakasûtra (II 276). The metre is Capalâ or that modification of Âryâ the first and the third *pâdas* of which consist of three feet and the first syllable of the fourth foot.

vimâṇabhavaṇa. yo devalokâd avatarati, tanmâtâ vimânam paçyati; yas tu narakâd udvṛityo 'tpadyate, tanmâtâ bhavanam; iti caturdaçai 'vai 'te svapnâ vimânabhavanayor ekataradarçanâd iti. S.

5) *cittamâṇaṃdiyâ.* makâraḥ prâkṛitatvât ..... *âṇaṃdiyâ ṇaṃdiya tti* pâṭhe tu â îshan sukhasaumyatâdibhâvaiḥ, nanditâ samṛiddhim upagatâ, tataç ca nanditâ samṛiddhataratâm upagatâ. S.

çirasyâvartta âvarttanam prâdakshiṇyena paribhramaṇaṃ yasya sa çirasyâvarttas taṃ. çirasâ 'prâptam ity anye. S. — The former explanation is not a probable one, because the Prâkṛit equivalent of *çirasyâvartta* would most likely be *sirassâvatta*, a form never met with. It is true that *saumanasyita* may become either *somaṇassiya* or *somoṇasiya*; but there is no form of *sirasâvattu* with two *s*. The second explanation *sirasâ vatta* = *çirasâ 'prâpta* is also very doubtful, because the change of प्र in व is anomalous. There is only one instance of this phonetic change, viz. *vahutta* = *prabhûta* Hem. I. 233. Dr. Ed. Müller proposes another one by explaining *vaḍiṃsaya* as an equivalent of *pratiçraya* (Beiträge zur Grammatik des Jainaprâkṛit p. 15). The Jainas explain it by *avataṃsaka*. That they are right, is proved not only by the existence of the form *vaḍiṃsaga*, but also by its original meaning which it seems to have in § 51, whence originated the secondary meaning 'splendid mansion'. I think *vatta* is the equivalent of *vyâpta*.

piva is according to Vararuci X 4 a Paiçâcî word, but according to Hemacandra II 182, it is also found in Mâhârâshṭrî. It is an enclitic, and, as in the enclitics *pi* (= *api*) and *ca*, its initial letter depends on the nature of the final letter of the preceding word. When an anusvâra precedes, the enclitics in question are to be written *piva*, *pi*, *ca*; witness: *kayaṃbuyaṃ piva*, *pattaṃ piva* 118, *taṃ pi*, *taṃ ca* (*chac-ca*) etc. But after a vowel they take the forms *viva*, *vi*, *ya* (or *a* in those Mss. which exhibit the *yaçrutî* only after *a*, *â*); witness: *Jiṇo viva* 138, *rukkhae viva* 61 v.l.; *se vi*; *se ya* (or *se a*) etc. The reason of this phonetic rule is obvious. For the enclitics were considered as making part of, and not as being separate from, the word to which they are appended. The enclitics *ca* and *vâ* sometimes cause the elision of a preceding anusvâra, e. g. *devehi ya devîhi ya*; *niggaṃthâṇa vâ niggaṃthîṇa vâ*. — It need hardly be remarked that *piva* is composed of the two particles *pi* = *api* and *va* = *iva*.

6) *devâṇuppiya tti*, devânâm priya, athavâ devân apy anurûpam prîṇâtî 'ti devânupriyas tasya sambodhanam. S.

8) îhâṃ tadarthaparyâlocanalakshaṇâm .... buddhiḥ sâmpratadarçinî, vijñânam pûrvâparârthavibhâvakam atîtânâgatavishayam. S. I believe *îhâ* not to be a *tatsama* but the derivate from *îkshâ*.

9) lakshaṇâni svastikacakrâdîni vyañjanâni mashatilakâdîni. S. .... *mâna* means volume; *unmâna*, weight; *pramâṇa*, length. The normal measures of the human body are given in the following gâthâ, quoted in the Saṃdehavishaushadhi:

jala-doṇam addha-bhâraṃ
sa-muhâi samûsio u jo navao |
mâṇ'-ummâṇa-pamâṇaṃ
tivihaṃ khalu lakkhaṇaṃ neyaṃ ‖ .

"A *droṇa* of water, a half *bhâra*, and who has the length of nine times the length of his own head; that is to be known as the threefold definition of *mâna*, *unmâna*, and *pramâṇa*".

The volume is found in the following way: jalasyâ 'tibhṛite kuṇḍe pramâtavyapurushe niveçite yaj jalaṃ niḥsarati tad yadi droṇamânaṃ syât tadâ sa purusho mânaprâpta ucyate. S. The human head measures, according to S., 12 *aṅgulas*, the whole body 108, but that of a Tîrthaṃkara, 120 *aṅgulas*, for his *ushṇîsha* takes up 12 *aṅgulas* more.

viṇṇâyapariṇayamitta tti vijñâtaṃ vijñânam pariṇatamâtraṃ yasya sa tathâ, kvacid *viṇṇaya-pariṇaya-mitta tti* pâṭhas, tatra vijña eva vijñakaḥ sa câ 'sau pariṇatamâtraç ca buddhyâdipariṇâmavân eva vijñakapariṇatamâtraḥ; iha mâtraçabdo buddhyâdipariṇâmasyâ 'bhinavatvakhyâpanaparaḥ. — Regarding the old enumeration of the sciences compare Weber, Fragment der Bhagavatî II 246.

One would expect *athavvaṇaveyâṇaṃ itihâsapaṃcamâṇaṃ*. In Prâkṛit the case-affixes are occasionally dropped, f. i. in § 4, *ujjalaṇaga* in § 14, before *saddhiṃ* § 61 etc.

saṃkhyâne saṃkalitavyavakalitâdiganitaskandhe suparinishṭhita iti yogaḥ, kvacit *saṃkhâṇe* ity anantaraṃ *sikkhâṇe* iti dṛiçyate, tatra çikshâm aṇati pratipâdayati çikshâṇam, âcâropadeçaçâstram ..... *nirutte tti* padabhañjane na çabdaniruktipratipâdake; *joisâm ayaṇe tti:* aya-vaya-daṃḍaka-dhâtuḥ (!) sarve gatyarthâ jñânârthâ iti, jyotishâṃ grahâdînâm ayane jñâne jyotiḥçâstre ity arthaḥ. S.

shashṭitantraṃ kapilîyaçâstram. the 60 *padârthas* are enumerated in S. where the following verses of the *Râjavârtika*, a Digambara Âgama, are quoted:

prâdhânâstitvam ekatvam arthavattvam athâ 'nyatâ |
pârârthyaṃ ca tathâ 'nyaikyaṃ viyogo yoga eva ca ‖
çeshavṛittir akartṛitvaṃ cûlikârthâ daça smṛitâḥ |
viparyayaḥ pañcavidhas tatho 'ktâ nava tushṭayaḥ ‖
karaṇânâm asâmarthyam ashṭâviṃçatidhâ matam |
iti shashṭiḥ padârthânâm ashṭabhiḥ saha siddhibhiḥ ‖

13) bhogârhâ bhogâ bhogabhogâs tân prâkṛitatvân napuṃsakatvam.

14) compare Âvaçyaka II 332: *âlaiya-mâla-maudo bhâsurabuṃdî-palaṃba-vaṇa-mâlâ* | samânayâ indratulyayâ ṛiddhyâ caranti 'ti

sâmânikâ indrasamânâyushkâdibhâvâḥ. S. about the lokapâlas see Weber l. c. 223—226. agramahishyaḥ .... tathâ câ "rsham: *Paumâ, Sivâ, Saî, Aṃjû Amalâ Accharâ, Navamiyâ, Rohiṇî.* tisraḥ parishado bâhyamadhyâbhyantarâ, jaghanyamadhyamotkṛishṭaviçeshaparivârabhûtâḥ, saptâ 'nîkâni hasty-açva-ratha-padâti-vṛishabhanartaka-gâthaka-jana-rûpâṇi sainyâni. ghanaṃ tu kâṃsyatâlâdi vaṃçâdi çushiram matam ||

tathâ tantrî 'tyâdi prâgvat; paṭunâ dakshapurusheṇa pravâdyata iti paṭupravâditaḥ, sa câ 'sau ghanamṛidaṅgaç ca prâkṛitatvâd viçeshaṇasya paranipâtas tata eteshâṃ ravas tene 'ti vyâkhyeyam. S.

§§ 15—16 are almost verbally repeated from the beginning of the Râjapraçnîyasûtra; the only difference is that there they refer to Sûryâbhadeva.

15) *imaṃ ca ṇaṃ ti* kevalaḥ paripûrṇaḥ sa câ 'sau kalpaç ca kâryakaraṇasamartha iti kevalakalpaḥ, kevala eva vâ kevalakalpaḥ samagraḥ, athavâ paripûrṇatâsâdharmyât kevalakalpaḥ kevalajñânasadṛiças tam. S.

ohi avadhi is one of the five divisions of *samyagjñâna;* compare The Paṇḍit IX 286 (Sarvadarç. Saṃ.) .... *egasâḍiyaṃ ti* ekakhaṇḍaçâṭakamayam uttarâsaṅgaṃ vaikakshikam. S.

16) *arahaṃtâṇaṃ.* sarvatra prâkṛite caturthyâḥ shashṭhî. tato devâdibhyo 'tiçayapûjâvandanâdy-arhatvâd arhadbhyo namaḥ, bahuvacanam advaitocchedâd arhadbahutvakhyâpanârthaṃ namaskartuḥ phalâtiçayajñâpanârthaṃ ca. tathâ karmâ-'ri-hananât *arihaṃtâṇaṃ.* karmabîjâbhâve bhave 'prarohâd *aruhaṃtâṇaṃ.* iti pâṭhatrayam. S.

dharmavaracâturantacakravartibhyaḥ. trayaḥ samudrâç caturtho

himavân ete catvâraḥ pṛithivyâ antâḥ, teshu bhavâḥ svâmitaye 'ti câturantâḥ, te ca cakravartinaḥ, dharmeshu varaḥ çreshṭho dharmavaraḥ, tatra vishaye câturantacakravartina iva dharmavaracâturantacakravartinaḥ S. Compare Hem. Prâk. Gram. I 44.

vyâvṛittachadmabhyaḥ. ghâtikarmâṇi saṃsâro vâ chadma tad vyâvṛittaṃ kshîṇaṃ yebhyas te. S.

saṃpâviukâmassa tti yady api bhagavataḥ siddhigatau kâmo nâ 'sti mokshe bhave ca sarvaniḥspṛiho munisattama iti vacanât, tadâ'pi tadanurûpaceshṭanât samprâptukâma iva samprâptukâmas tatrâ 'samprâpta ity arthas tasya ... S.

17) Compare Fausböll, Jâtaka vol. I, part. 1, p. 49: Buddhâ nâma vessakule vâ suddakule vâ na nibbattanti, lokasammate pana khattiyakule vâ brâhmaṇakule vâ ti dvîsu yeva kulesu nibbattanti.

A shorter account of the exchange of the embryos is given in the Âcârâṅgasûtra.

18) ugrâ Âdidevenâ "rakshaṇakatve ye niyuktâs teshâṃ kuleshu, tadvaṃçajeshu; bhogâ ye tenai 'va gurutvena vyavahṛitâs tadvaṃçajeshu etc. S. .... jâtir mâtrikaḥ pakshaḥ, kulam pitṛisamuttham. S.

19) *joṇîjammaṇa tti* yonyâ janmârthaṃ nishkramaṇena. S.

21) *jîyam eyaṃ ti* jîtam âcaritaṃ kalpa ity ekârthâḥ. S. *gabbhe tti* garbhaḥ putrikâlakshaṇaḥ. S.

Harer Indrasya naigameshî âdeçapratîchaka iti vyutpattyâ 'nvarthanâmânam. S.

§§ 26 and 27) A similar passage is found in the Râjapraçnîyasûtra not far from that alluded to above. There, Sûryâbhadeva sends Abhiyogikadeva to Mahâvîra in Âmalakalpaka.

27) *veuvviyasamugghâeṇaṃ ti* uttaravaikriyakaraṇâya prayatnaviçesheṇa, *samohaṇai tti* samuddhanti pradeçân vikshipati, *samohaṇṇai tti* pâṭhe samuddhanyate samudghâtavân; tatsvarûpam âha: *saṃkhijjâiṃ ti* daṇḍa iva daṇḍa ûrdhvâdhaâyataḥ çarîrabâhulyo jîvapradeçakarmapudgalasamûhas taṃ ... iha ca yady api ratnâdipudgalâ audârikâ vaikriyasamudghâte ca vaikriyâ eva grâhyâ bhavanti, tathâ 'pî 'ha teshâṃ ratnâdipudgalânâm iva sâratâpratipâdanâya ratnânâm ityâdy uktaṃ tac ca ratnânâm ive 'tyâdi vyâkhyeyam. anye tv âhur: audârikâ api te gṛihîtâḥ santo vaikriyatayâ pariṇamantî 'ti tena ca daṇḍena ratnâdînâṃ yathâbâdarân asârân daṇḍanisargagṛihîtân pudgalân pariçâṭya yathâsûkshmân sârân paryâdatte daṇḍanisargagṛihîtân sâmastyenâ "datte ity arthaḥ. S.

28) The forms: *docca* (or *ducca*) and *tacca* are derived from the presaṃskṛitic **dvitya* **tṛitya*, compare Zend *bitya*, *thritya*, Lit. *trecza*. By insertion of an *i* before the *y*, the forms *dvitiya* and *tritiya*, were produced which occur in the dialect of the Gâthâs; compare old Persian: *duvitiya*, *tritiya*, and old Slavonian *tretij*. The equivalents of *dvitiya*, *tṛitiya* in Pâli are *dutiya tatiya*; in Jaina Prâkṛit: *vittiya* (*tt* for the same reason as *kk* in *sukkila* = *çukla*); *vitiya*, *tatiya*; *biiya*, *taiya*, (compare *caitya* = *cetiya*, *ceiya*) *bîya*. By

lengthening the inserted *i*, the Saṃskṛit words *dvitîya*, *tṛitîya* were produced, just as the affix *îya* frequently stands in Saṃskṛit words for the original affix *ya*.

30) Kâsavagotta is generally written, and not Kâsavasagotta, as might be expected.

32) vicitram âçcaryakṛit, ullocasya vitânasya, citritaṃ vividhacitrayuktaṃ, talam adhobhâgo yasmiṃs tat tathâ. *vicitta-ulloya-cilliya-tale tti* pâṭhe tu vicitro vividhacitrayukta ulloka uparibhâgo yatra, *cilliyaṃ* dipyamânaṃ talam adhobhâgo yatra ... tathâ bahu atyarthaṃ samo nimnonnataḥ pañcavarṇakuṭṭimakalitaḥ, suvibhaktaḥ kṛitasvastikaḥ .... tathâ sushṭu gandhavarâṇâm pradhânavâsânâṃ gandho yasminn asti tat sugandhavaragandhikaṃ tatra, kvacit *sugaṃdha-vara-gaṃdha-gaṃdhie tti* pâṭhas ..... gandhavarttir gandhadravyaguṭikâ .... *sâliṃgaṇe* 'tyâdi: sahâ "liṅganavarttyâ çarîrapramâṇagaṇḍopadhânena yat tat sâliṅgavarttikaṃ tasmin, ubhayata ubhau çirontapâdântâv âçritya, *vivvoyaṇe tti* upadhâne gaṇḍuke yatra tat tathâ ..... kvacit *paṇṇattaga-vivvoyaṇi tti* dṛiçyate tatra ca suparikarmitagaṇḍopadhâne ity arthaḥ ..... (*uddâla*) avadâlo 'vadalanam pâdanyâse 'dhogamanam ity arthaḥ. S.

maghamaghaṃta comp. panjâbî: *maghṇâ* to burn, hindî: *maghan* redolent. Similarly forms of intensive verbs are *jalajaliṃta gumagumâyaṃta*, *misimisiṃta*, *taḍataḍaṃta*, *kiḍikiḍiyabhûe*. ..... *rûya* = *rûta* cotton mah. and guz.: *rû*, hind.: *rûî*, panj.: *rûṃ*.

S. reads *tulla* (= tulya); tûla iti pâṭhe tu tûlam arkatûlam eteshâm iva sparço yasya. S.

33) atha prathamam ibhadarçanaṃ sâmânyavṛittim âçrityo 'ktam; anyathâ prathamajinajananî vṛishabham eva, çrîVîramâtâ prathamaṃ siṃham adrâkshîd iti vṛiddhâḥ. S. This dogma, which has caused the different description of the dreams in Ms. A, is not universally acknowledged. For the Âvaçyaka Sûtra takes no heed of it, but gives the same gâthâ, 'gaya vasaha etc.' as enumeration of the dreams of Devânandâ and Triçalâ, just like the Kalpasûtra.

33) *cauddaṃtaṃ* caturdantamusalam; kvacit *taoyacauddaṃtam* iti pâṭhas, tatra tataç ca iti yojyamâne *tae ṇaṃ* iti paunaruktyaṃ syât tasmât tataujaso mahâbalâç .... *ûsiyaṃ ti* ucchritam, nirvibhaktikapâṭhe tu *galiye* 'tyâdi viçeshaṇena saha karmadhârayaḥ. S.

34) preraṇam iva preraṇaṃ tene 'va visarpad ullasat ..... kila kakudaṃ svabhâvâd evo 'llasad asti tatro 'tprekshyate, ne'daṃ svayam evo 'llasaty api tu sahajaçobhâsambhâreṇe 'va preryate ullâsayati. S.

35) mushâgataṃ yat pravarakanakaṃ tad api tâpitam ata evâ "vartamânaṃ tadvad vṛitte vimalataḍitsadṛiçe nayane yasya sa tathâ. ârshatvâd viçeshaṇaviçeshyayoḥ pûrvaparanipâtâniyamaḥ. S. In Prâkṛit, the members of compounds are frequently not connected in the same order in which they ought to stand according to Saṃskṛit grammar.

ucchritam udagram sunirmitaṃ kuṇḍalikṛitaṃ sujâtaṃ sam-

pûrṇam âsphoṭitam âcchoṭitaṃ lâṅgûlam pucchacchaṭâ yena sa tathâ. S. *Kalpadruma:* kuṇḍalâkârakṛitam asti, pucchâgraṃ dvayoḥ karṇayor antarâle ânîtam asti. Stevenson ties a knot in the tail of the lion, and depicts it carefully in a footnote.

uvayamâṇaṃ is rendered by the commentators: *avapatat avatarat.* I think it stands for **uvavayamâṇa* = Skṛit. *upapatat.* Of two successive syllables which are identical or nearly so, one is frequently dropped; comp. Ed. Müller, Beiträge, p. 24.

36) uccam âgatam prâptam, athavâ ucca unnato 'gaḥ parvato himavâṃs tatra jâtam uccâgajaṃ yat sthânaṃ kamalaṃ tatra lashṭaṃ yathâ bhavaty evaṃ saṃsthitam. S. Çrî is described from the toes upwards, as is the rule for the descriptions of gods; Mallinâtha on Kumârasambhava I, 38: devatânâm pâdâṅgushṭhaprabhṛiti varṇyate, manushâṇâṃ keçâd ârabhye 'ti dharmikâḥ.

(*ujjuya*) ṛijvî saralâ, samâ 'vishamâ, saṃhitâ nirantarâ, tanukâ sukshmâ, âdeyâ subhagâ, laṭabhâ, suviçâlâ. S.

kvacit *âtiyapattiya tti* dṛiçyate tatra trikam pṛishṭhavaṃçasyâ 'dhas tatsamîpopalakshito 'grabhâgo 'pi trikaṃ tat, â trikât trikaṃ yâvat prâptir avakâço yasya tad âtrikaprâptikam. S.

The occurrence of the word *dîṇâra* betrays the late composition of the description of the dreams; comp. note to 46 and Introduction p. 23. — yathâ kila râjâ kauṭumbikaiḥ çobhate, evam ânanam api çobhâsamudayene 'ti. S.

gumagumâyamâṇa. Mallinâtha on Kirâtârjunîya VI, 4 exhibits a word ghumaghumâyamâna which means sounding. comp. hindî: *ghumaghumânâ* to revolve, to prevaricate; panjâbî: *ghummṇâ* to turn round, roll. But see Hem. IV 117 and 161.

38) ghanagambhîrasya vanakuñjâder vitimirakaram ..... pramâṇapakshayor varshâdipramâṇanibandhanayoḥ çuklakṛishṇapakshayor antar madhye râjantî lekhâ yasya sa tathâ tam, athavâ cândramasâpekshayâ pramâṇapakshayor ante paurṇamâsyâṃ, râgadâ harshadâyinyo lekhâḥ kalâ yasya sa tam. S.

39) aṅkanaṃ jyotishasya: jyotishâṃ samûho jyotishaṃ jyotiçcakraṃ tasya aṅkanaṃ meshâdirâçisaṃkramaṇâdinâ lakshaṇakaṃ jñâpakam. S.

râtrau, makârasyâ 'lâkshaṇikatvât, uddhâvataḥ ucchṛiṅkhalân duḥpracârân .... *suddhaṃta* iti pâṭhe tu çuddhânto 'ntaḥpuraṃ tatra duḥkhena yo 'sau pracâras tatpramardanaṃ, yathâ hi râjñâm antaḥpure pracâro dushkaras tathâ râtrâv api tamoviluptacakshushâm pathikânâṃ, sûryodaye tu sukaraḥ pracâraḥ pathishv iti. S.

40) *sukkila.* Two consonants, which resist assimilation, are usually separated in Prâkṛit by an inserted vowel, which in old verses is often not reckoned as a syllable; comp. Zeitschrift für vergl. Sprachf. XXIII p. 594 sqq.

Sometimes the process of assimilation of two consonants had just begun when it was stopped by the insertion of a vowel.

Thus we have *aṃbila* = *aṃbla* = *amla; sumiṇa* = **sumna* (comp. somnus) = **supna* (comp. ὕπνος) = *svapna.* Sometimes, the second consonant was doubled by the influence of the first, and *vice versa:* 1) *puruvva* (Mṛicchakaṭikâ 39, 23) = **purvva* = *pûrva; murukkha* (Hem. II, 112.) = **murikcha* = *mûrkha.* 2) *sukkila* = **sukkla* = *çukla*, (in *sukkilla* both consonants are doubled); *abhikkhaṇaṃ* = **abhikkhṇaṃ* = **abhikhṇaṃ* = *abhîkshṇaṃ* (an offshoot of the supposed form *abhikhṇaṃ* is the Pâli *abhikhaṇam*, which would be in Prâkṛit **abhihaṇaṃ* comp. *suhuma* = Pâli *sukhuma* = Saṃskṛit *sûkshma*). Sometimes the two consonants are assimilated, nevertheless the second is not totally absorbed in the assimilated group, but appears after an inserted vowel: *duttiya* = **dvitya* (*tt* = *ty* comp. *patteya* = *pratyeka, pattiya* = *pratyayita*); *ajjiyâ* = **ajyâ* (comp. *jyotsnâ* = **dyotsnâ, dosinâ* in Prâkṛit and Pâli) = *âryâ.* (The commentators derive *ajjiyâ* from *âryikâ*, but that word is of rare occurence in Saṃskṛit.) *avagijjhiya* = **avagijhya* = *avagṛihya; sassiriya* = *saçrîka.*

42) taruṇaçabdasye 'ha sambandhât taruṇaravikiraṇair bodhitâni ..... 'athavâ *puṇar-avi tti* punar api kiraṇaḥ sûryas tena taruṇenâ 'bhinavena bodhitâni. ... S.

pahakara and *nihelaṇa* are pronounced to be *deçya* in S.

pamuiyaṃtabhamara pramuditam antaçcittaṃ yeshâṃ te pramuditântaras te ca bhramaragaṇâç ca. S. I believe that *pamuiyaṃta* is the present participle of *pra-mud;* the *d* of *mud* seems to have been changed in *i*, comp. *sammui.*

sararuhâbhirâmaṃ ti sarassu sarovareshu arham pûjyam ata evâ 'bhirâmaṃ sarorhâbhirâmam. uc câ 'rhatî 'ti' (Hem. II 111) hakârât pûrva ukâraḥ. S. This explanation is obviously wrong; for *sararuha* : *saroruha* : : *maṇahara* : *manohara*, comp. Hem. I 156.

43) kvacit punaḥ: *ukkaḍa-ummî-sahassaṃ ti* pâṭhaḥ. sa ca subodha eva; tataḥ paraṃ: *pabaṃdhâyamâṇâṇiyaṃtabhâsuratadâbhirâmaṃ ti* pâṭhas, tatra ce 'tthaṃ vyâkhyâ: prabandhena nairantaryeṇâ 'yamâno gacchan, âyamâno vâ pratyâgacchan prabandhâyamânaḥ; na vidyate *niyaṃta tti* paçyan drashṭâ yasya tat aniyatyaṃ (!) kenâ 'py adṛiçyamânaṃ dûratvâd ata eva bhâsuram bhayaṃkaraṃ yat taṭam parapâraṃ tenâ 'bhirâmam. S.

44) vâsâiigâni vâsânâṃ Gandhamâlinîgranthoktasurabhîkaraṇopâyabhûtataddravyâṇi ca teshâm uttamena maghamaghâyamânena gandheno 'ddhutena itas tato prasṛitenâ 'bhirâmaṃ yat tat tathâ. S.

46) jvâlojvalanaka ârshatvâd vibhaktilope tena *katthai* etc. S.

ete ca svapnavarṇakâ bahushu âdarçeshu na dṛiçyanta eva; yeshv api santi, teshv api bahavo vâcanâbhedâḥ. ata eva bahubhiḥ paryushaṇâkalpopanibandhakârair svapnâ na vyâcacakshire, mayâ tu yathâmnâyaṃ yathâbodhaṃ kiṃcid vyâkhyâtam. S.

56) kauṭumbikapurushân âdeçakâriṇaḥ. S.

59) *pahara tti* ghañvṛiddher ve 'ti (Hem. I 68) prâkṛitalakshaṇena hrasvaḥ. S.

60) aṭṭanaçâlâ vyâyâmaçâlâ ..... karaṇâni ca mallaçâstraprasiddhâni taiḥ çrântaḥ sâmânyena pariçrânto 'ṅgapratyaṅgâpekshayâ sarvataḥ. S.

prîṇanîyaiḥ rasarudhirâdidhâtusamatâkâribhiḥ, dîpanîyair agnijananaiḥ, madanîyaiḥ manmathavardhanîyaiḥ, vṛiṃhaṇîyair mâṃsopacayakâribhiḥ, darpaṇîyair balakaraiḥ. S.

(vîravalayâni). subhaṭo hi yadi kvacid anyo 'sti vîravratadhârî tadâ 'sau mâṃ vijitya mocayatv etâni valayânî 'ti spardhayan yâni kaṭakâni paridadhâti tâni vîravalayanî 'ty ucyante ... S.

61) *dharijjamâṇeṇaṃ* dhriyamâṇena, vâcanântare Sûryâbhavad alaṃkâravarṇakaḥ sa cai 'vam: *egâvaliṃ pi ṇiṃ dhei* (!) ityâdi Râjapraçnîyasûtraṃ. — I have not been able to verify in my copies the passage of the Râjapraçnîyasûtra which Jinaprabhamuni proceeds to explain after the words just quoted. At the end of his comment on the passage in question, he says: *câmarâu tti* yady api câmaraçabdo napuṃsakaliṅge rûḍhas, tathâ 'pî 'ha strîliṅgatayâ nirdishṭas, tathai 'va gauḍamate rûḍhatvâd iti. According to Bharata Malla's commentary on the Amarakosha, the forms *câmarâ* and *câmarî* were also used. (Comp. Petersburgh Dictionary. s. v. câmara.) That commentary, in which the etymologies are given conformably with Vopadeva's system of grammar, is the favorite authority of the Bengal school; its author flourished in the middle of last century (see Colebrooke: Misc. Ess. II 51. Wilson: Works V 206). He is therefore much later than Jinaprabhamuni, who most probably used one of Bharata Malla's authorities. —

aneke ye gaṇanâyakâḥ prakṛitimahattarâ, daṇḍanâyakâs tantrapâlâ, râjâno mâṇḍalikaḥ, îçvarâ yuvarâjâḥ, aṇimâdyaiçvaryayuktâ ity anye, talavarâḥ paritushṭanarapatipradattapaṭṭabandhavibhûshitâ râjasthânîyâḥ, mâṇḍalikâç (!) chinnamaḍambâdhipâḥ, kauṭumbikâḥ katipayakuṭumbaprabhavo 'valagakâḥ (? avalagakâḥ Kir.) grâmamahattarâ vâ, mantriṇaḥ sacivâḥ, mahâmantriṇo mahâmâtyâ mantrimaṇḍalapradhânâ hastisâdhanâdhyakshâ vâ, gaṇakâ jyotishikâ bhâṇḍâgârikâ vâ, dauvârikâḥ pratîhârâ râjadvârikâ vâ, amâtyâ râjyâdhishṭhâyakâḥ, ceṭâḥ pâdamûlikâ dâsâ vâ, pîṭhamardâ âsthâne âsannasevakâ vayasyâ ity arthaḥ, veçyâcâryâ vâ, nâgarâ nagaravâsiprakṛitayo râjadeyavibhâgâḥ, nigamâḥ kâraṇikâ vaṇijo vâ, çreshṭhinaḥ çrîdevatâdhyâsitasauvarṇapaṭṭabhûshitottamâṅgâḥ, senâpatayo nṛipanirûpîtâç caturaṅgasainyanâyakâḥ, sârthavâhâḥ sârthanâyakâḥ, dûtâ anyeshâṃ gatvâ râjâdeçavedakâḥ, sandhipâlâ râjyasandhirakshakâḥ; eshâṃ dvandvas tatas tair iha tṛitîyabahuvacanalopo drashṭavyaḥ. gâmâgara down to *siṃghâḍaesu* kvacic ca dṛiçyate. This reading seems, therefore, to have not been adopted by the Cûrṇikâra. tatra karâdigamyâ grâmâḥ, âkarâ lohâdyutpattibhûmayaḥ nai'teshu karo 'stî 'ti nakarâni, kheṭâni dhûliprâkâropetâni, karvaṭâni kunagarâṇi, maḍambâni sarvato 'rdhayojanât parato 'vasthitagrâmâṇi, droṇamukhâni yatra jalasthalapathâv ubhâv api staḥ, pattanâni yeshu jalasthalapathayor anyatareṇa paryâhârapraveçaḥ, âçramâs tîrthasthânâni munisthânâni vâ, saṃvâhâḥ samabhûmau kṛishiṃ kṛitvâ yeshu durgabhûmishu dhânyâni kṛishîvalâḥ saṃvahanti rakshârthaṃ, sanniveçâḥ sârthaçakaṭâdes tato dvandvas teshu. kvacit *sannivesaghosesu* iti pâṭhas, tatra ghoshâ gokulâni teshu. S.

The commentator states that *gṛiha* must be understood with (or after) each of the words *saṃti.* etc. sandhigṛiham bhittyor antarâle pracchannasthânam. S.

90—91) *saṃta* sad vidyamânaṃ na punar indrajâlâdâv ivâ 'vâstavaṃ yat sârasvâpateyam pradhânadravyam. S.

95) uktaṃ ca Vâgbhaṭe:

vâtilaiç ca bhaved garbhaḥ kubjândhajaḍavâmanaḥ |
pittalaiḥ khalatiḥ piṅgaç citrî pâṇḍuḥ kaphâtmabhiḥ ||

96) The passage in brackets is wanting in Ms. A; and S declares: bahutra *uccaṭṭhâṇe* 'tyâdi na dṛiçyate. It is decidedly spurious, because it contains the word *ucca*, a technical term of the graeco-indian astrology, which science was not developed in India before the fourth century A. D.

After having sent the Introduction to press, I find the following passage in the Kalpalatâ: Skandapurâṇe punar viçeshaç câ 'yam: gatakaliyugasaṃ. 2691 varshe caitra su di trayodaçyâṃ maṅgalavâre uttaraphalgunînakshatre ghaṭî 60 râtrigataghaṭî 15 pala 21 samaye makaralagne candrahorâyâṃ çrîVîrajanme 'ti. As Mahâvîra lived 72 years, his death would fall in 2763 KY or 339 A.D.

It will be agreed that the statement of the Skandapurâṇa has no weight at all, because its name is used to make modern compositions, such as the Mâhâtmyas, pass for ancient works. I cannot decide whether this chronological notice of the "Skandapurâṇa", which obviously has an astrological purport, is based on an older tradition or not; I can only assert that I have found it nowhere except in the Kalpalatâ. It may be noticed that the birth of Mahâvîra, according to the passage just quoted, falls in 411 B.C, or just 100 years before the beginning of the Seleucidan Era.

97) utpiñjalo bhṛiçam âkulaḥ sa ivâ "caratî 'ty âcârakvipi çatari ca: çatrânasa (Hem. III 181) iti prâkṛitalakshaṇena mâṇâdeçe *uppiṃjalamâṇi tti* siddham tadbhûtâbhûtaçabdasyo 'pamârthatvâd utpiñjalantî 'va S.

98) The passage in brackets is found only in CE and the Saṃdehavishaushadhi and Kiraṇâvalî. The former commentary gives the following explanation: tac ca, bahushv âdarçeshu na dṛishṭam. tasyâ api vâcanâyâ upari kaçcid vyâcashṭe iti tatrâ 'pi kiṃcid vivriyate. *piyaṭṭhayâe* prîtyartham; *piyaṃ niveemo* priyam ishṭaṃ vastu putrajanmalakshaṇaṃ nivedayâmaḥ; *piyaṃ te bhavau* etac ca priyanivedanam priyam bhavatv iti (these are the words of the dâsîs who announce the birth of Mahâvîra to the king) tasyâ dânam *mauḍavajjaṃ* ti mukuṭasya râjaçihnatvât strîṇâṃ câ 'nucitatvât tasye 'ti tadvarjanam; *jahâ mâliyaṃ* yathâ dhâritam, *mala-malla* dhâraṇe iti yathâ parihitam ity arthaḥ *umoyam* avamucyate paridhîyate yaḥ so 'vamocakaḥ âbharaṇaṃ tam *matthae dhoya* (!) aṅgapraticârikâṇâm mastakâni kshâlayati dâsatvâpanayanârtham, svâminâ dhautamastakasya hi dâsatvam apagacchatî 'ti lokavyavahâraḥ. S. A similar passage is found in the Ṭîkâ of the Uttarâdhyayana 18,51, where king Bala, on receiving the news that a son is born to him, *tesiṃ paḍicâriyâṇaṃ mauḍavajjaṃ sarîrâlaṃkâraṃ dalayai, matthae dhovati, vivalaṃ pîḍâṇaṃ dalayati.*

100) mañcâ mâlakâḥ prekshaṇakadrashṭṛijanopaveçananimittam atimañcâs teshâm api upari ye ..... *lâiyaṃ* chagaṇâdinâ bhûmau lepanam; *ulloiyaṃ* saṭikâdinâ kuṭyâdishu dhavalanaṃ tâbhyâm mahitam pûjitaṃ, tair eva vâ mahitam pûjanaṃ yatra tat tathâ; anye tu: liptam ullocitam ullocayuktam mahitaṃ ce 'ti vyâcakshate. S.

Dardara is sandal brought from Dardara. — It is the custom in India up to this day, to decorate walls with impressions of a painted hand with the fingers stretched out.

S.

There is some confusion in the grammatical construction of this paragraph, as well as of § 113; for *Mahâvîre . . devehiṃ . . abhitthuṇamâṇâ . . vayâsî* must be interpreted, as if the text had: *Mahâvîraṃ . . devâ . . abhitthuṇamâṇâ vayâsî* (Mahâvîraṃ . . devâḥ . . abhishṭuvantaḥ . . avâdishuḥ). It is generally known that in modern dialects of India a similar confusion of the active and passive construction has become the rule in the construction of the perfect. Compare the following examples taken from Etherington's Hindî grammar p. 94: *larkhene ghoṛâ dekhâ* 'the boy saw the horse'. *larkhene ghoṛî dekhî* 'the boy saw the mare'. *gurune celeko sîkhâyâ* 'the teacher taught the pupil' *kisânne bailoṃko becâ hai*, 'the peasant has sold the bullocks'. *râṇîne apnî ek sahelîko bulâyâ* 'the queen called one of her attendants'. Perhaps the earliest trace of this curious construction may be recognised in that of our passage.

111) E. Müller (Beiträge zur Grammatik des Jainaprâkṛit p. 50) asserts that in the Kalpasûtra *bhaddante* is always written instead of *bhadanta*, and that, consequently, Childers must be wrong in maintaining the identity of *bhadante* and *bhante*. He concurs with Prof. E. Kuhn in deriving this word from *bhonto, bhavantas*, or *bhagavantas*. Dr. Müller's argument is wrong, because, wherever *bhaddaṃte* occurs in the Kalpasûtra and in any other Jaina work I have consulted, it does not stand for *bhaṃte*, but for *bhaddaṃ te*, and it is rendered *bhadraṃ te* by the commentators. They render *bhaṃte* by *bhadantas*, and I consider their explanation preferable to that of Prof. E. Kuhn, because **bhonto* could only be changed in **bhunto*. The change of the Saṃskṛit diphthong *o* to *u* is nearly unheard of in Pâli and Prâkṛit.

112) *neraiyâ devatitthaṃkarâ ya ohissa bâhirâ hoṃti, pâsaṃti savvao khalu, sesâ deseṇa pâsaṃti*, iti vacanât sarvotkṛishṭam âbhogikam âbhogaprayojanam apratipâty âkevalotpatter jñânadarçanaṃ, avadhijñânam avadhidarçanaṃ câ "sît, tac ca paramâvadheḥ kiṃcin nyûnam. *ahohie* iti kvacit pâṭhas, tatra adhovadhir adhaḥparicchedabahulo 'bhyantarâvadhir ity arthaḥ; tathâ ca cûrṇiḥ: *ahohiya tti abbhiṃtarodhî*, ata evo 'ktaṃ *neraie* 'ty âdi. S.

vicchardya viçesheṇa tyaktvâ, nishkramaṇamahimakaraṇato vicchardavad vâ kṛitvâ, vicchardo vistâraḥ. S. The form *viggovaittâ* instead of *vigovaittâ* (*vigopya* = *prakaṭîkṛitya*), is proved to be correct by the majority of the manuscripts. The commentary S suggests another explanation of *vigopya*: gupi gopanakutsanayoḥ; tato vigopya kutsanîyam etad asthiratvâd ity uktvâ dîyata iti. — dâyikâ gotrikâs tebhyo dânaṃ dhanavibhâgam paribhâjya vibhâgaço dattvâ. S.

113) pûrvadiggâminyâṃ châyâyâm, *porisîe* pâçcâtyapaurushyâm pramâṇaprâptâyâṃ koṭiprâptâyâm abhinivṛittâyâṃ jâtâyâm. S. — C and H explain *paurushyâm* by *paçcâtyapraharamânâyâm*.

S.

2) samastagaṇipiṭakadhârakâḥ. gaṇo 'stî 'ti gaṇî bhâvâcâryas tasya piṭakam iva ratnâdikaraṇḍakam iva gaṇipiṭakaṃ dvâdaçâṅgî; tad api na deçataḥ Sthûlabhadrasyè 'va, kiṃ tu samastaṃ sarvâksharasaṃnipâtitvât tad dhârayanti sûtrato 'rthataç ca ye te tathâ. S.

3) In the more modern commentaries the legends of the seven first and some later Theras are told at their proper places. They contain nearly all the Çvetâmbaras know of the early history of their church. As I intend to publish next the Pariçishṭaparva or Sthavirâvalîcarita of Hemacandra, and some other historical treatises of the Jainas, I omit the legends here, and restrict my extracts to the explanation of the text.

Çayyambhava is said to have composed the Daçâvaikalikasûtra for the benefit of his son. The following stanza is found identically at the end of that work, and in the Ṛishimaṇḍalaprakaraṇa:

Sijjaṃbhavaṃ gaṇaharaṃ
jiṇa-paḍimâ-daṃsaṇeṇa paḍibuddhaṃ |
Maṇaga-piyaraṃ dasakâliyassa nijjûhagaṃ vaṃde ||

4) *Suṭṭhiyasuppaḍibuddhâṇaṃ ti.* susthitau suvihatakriyânishṭhau, supratibuddhau sujñâtatattvau tato viçeshaṇakarmadhârayaḥ, koṭikakâkandakâv iti nâma; anye tv ittham âcakshate: susthitasupratibuddhâv iti nâma, koṭikakâkandakâv iti virudaprâyaṃ viçeshaṇaṃ: koṭyaṃçasûrimantrajâpaparijñânâdinâ kauṭikau, kâkandyâṃ nagaryâṃ jâtatvât kâkandakau, tato viçeshaṇasamâsaḥ. ye tu susthitasupratibuddha ity ekam eva nâma manyante tadabhiprâyaṃ na vidmo dvitvavyâghâtât. yadi paraṃ: madhukaiṭanyâyena susthitena sahacaritaḥ supratibuddhaḥ susthitasupratibuddha iti pakshaḥ çaraṇaṃ, tatra ca pûjyatvâd bahuvacanaṃ jñeyam. S.

5) bahavo 'tra vâcanâbhedâ lekhakavaiguṇyâj jâtâḥ. tattatstha-virâṇâṃ ca çâkhâḥ kulâni ca prâyaḥ sâmprataṃ nâ 'nuvartante nâmântaratirohitâni vâ bhavishyanti, ato nirṇayaḥ kartuṃ na pâryate pâṭheshu. tathâ hi çâkhâsu: kvacid âdarçe *Koḍavaṇî* (6) 'ti, kvacit *Kuṃḍadhâṛî* 'ti; tathâ hi kvacit *Puṇṇapattiyâ* (7) iti, kvacit *Suvaṇṇapattiyâ* iti. evaṃ kuleshv api, kvacit *Ullagaccha taiyaṃ* (7,6) *ti* pâṭhaḥ, kvacit *aha Ullaṭṭuṃdha taiyaṃ ti.* tasmâd atra bahuçrutâ eva pramâṇaṃ, mâ 'bhûd utsûtram iti. tatra kulam ekâcâryasaṃtatiḥ, çâkhâsu tasyâm eva saṃtatau purushaviçeshâṇâm pṛithak pṛithag anvayâ, ekavâcanâcâryayatisamudâyo gaṇaḥ:

tattha kulaṃ vineyaṃ
egâyariyassa saṃtatî-jâo |
doṇha kulâṇa mîho puṇa
sâvilkhâṇaṃ gaṇo hoi ||

tti vacanât. athavâ çâkhâ vivakshitâdyapurushasya saṃtâno, yathâ Vairasvâminâmnâ Vairaçâkhâ, 'smâkaṃ kulâni tu tacchishyâṇâm pṛithak pṛithag anvayâ, yathâ Câṃdrakulaṃ Nâgendrakulam ity-âdi. S.

6) *Chulue Rohagutte tti* vipratipattyavasthâyâṃ dravya-guṇa-karma-sâmânya-viçesha-samavâyâ-"kya-shaṭ-padârtha-prarûpakatvât shaṭ, gotreṇa Ulûkatvâd Ulûkaḥ; shaṭ câ 'sâv Ulûkaç ca Shaḍulûkaḥ. Ulûkatvam eva vyanakti: *Kosie gotteṇaṃ ti* ulûkakauçikaçabdayor nâ 'rthabhedaḥ. *Terâsiya iti* Trairâçikâ, jîvâ-'jîva-nojîvâ-"khya-râçitrayaprarûpiṇas tacchishyapraçishyâḥ. — Then follows the legend about Rohagupta (544 A.V.) The Vaiçeshika Philosophy is said to have been developed out of the Trairâçika-doctrin: krameṇa Vaiçeshikadarçanaṃ tataḥ prarûḍham. S.

The name Aulûkadarçana or Owl-Philosophy is given to the Vaiçeshika, perhaps because of 'the bewildering style of elucidation in which the Naiyayiks glory', or because one of the first doubts raised in Vaiçeshika-Nyâya treatises is that about the nature of darkness, whether it be a *dravya* or not. Thus says çrîHarsha in the Uttara-Naishadhîya XX, 36:

dhvântasya vâmoru vicâraṇâyaṃ
Vaiçeshikaṃ câru matam matam me |
Aulûkam âhu khalu darçanaṃ tat
kshamaṃ tamastattvanirûpaṇâya ||

Or, as Prof. Weber thinks, the name Aulukya for Kâṇâda had its origin in a quibble on the word kâṇâda, which means either 'follower of Kaṇâda' or 'crow-eater'.

12) atrâ 'ntare *vaṃdâmi Phaggumittaṃ ca* ityâdi gâthâvṛindam bahushv âdarçeshu dṛiçyate, katipayapustakeshu ca: *therassa ṇaṃ ajjaPhaggumittassa Goyamaguttassa ajjaDhaṇagirî there aṃtevâsî Vâsiṭṭhagotte* ityâdi yâvat: *therassa ṇaṃ ajjaSihassa Kâsavagottassa ajjaDhamme there aṃtevâsî Kâsavagotte, therassa ṇaṃ ajjaDhammassa Kâsavagottassa ajjaSaṃḍile there aṃtevâsî* iti paryantaṃ dṛiçyate, tadanantaraṃ ca *vaṃdâmi Phaggumittaṃ ca* ityâdi gâthâs; tatra ca gadyoktârthaḥ punaḥ padyaiḥ saṃgṛihîta iti na paunaruktyam bhâvanîyam. S.

III. Sâmâcârî.

2) *kaḍiyâiṃ* kaṭayuktâni; *ukkaṃpiyâiṃ* dhavalitâni; *channâiṃ* triṇâdibhiḥ; *littâiṃ* chaganâdyaiḥ, kvacit *guttâiṃ ti* pâṭhas, tatra guptâni vṛitikaraṇadvârapidhânâdibhiḥ; *ghaṭṭhâiṃ* vishamabhûmibhañjanât; *maṭṭhâiṃ* çlakshṇîkṛitâni, kvacit *saṃmaṭṭhâiṃ ti* pâṭhas tatra samantân mṛishṭâni masṛiṇîkṛitâni sammṛishṭâni; *saṃpadhûmiyâiṃ* saugandhyâpâdanârthaṃ dhûpanair vâsitâni; *khâtodagâiṃ* kṛitapraṇâlîrûpajalamârgâṇi; *khâyaniddhamaṇâiṃ niddhamaṇaṃ khâlaṃ* gṛihât salilaṃ yena nirgacchati; *appaṇo aṭṭhâe* âtmârthaṃ gṛihasthaiḥ kṛitâni; parikarmitâni, karoteḥ kâṇḍaṃ karotî 'ty âdâv iva parikarmârthatvât; paribhuktâni svayam paribhujyamânatvât; ata eva pariṇâmitâni acittîkṛitâni; tataḥ saviṃçatirâtre mâse gate amî adhikaraṇadoshâ na bhavanti. yadi punaḥ sâdhavaḥ: sthitâḥ sma iti brûyus, tadâ te pravrajitânâm avasthânena subhikshaṃ sambhâvya gṛihiṇas taptâyogolakalpâd aṃtâla-(? also in the Kalpalatâ)-kshetrakarshaṇagṛihacchâdanâdîni kuryuḥ, tathâ câ 'dhikaraṇadoshâ; atas tatparihârâya pañcâçatâ dinaiḥ sthitâḥ sma iti vâcyam ..... iha hi paryushaṇâ dvidhâ: gṛihijñâtâjñâtabhedât. tatra gṛihiṇâṃ ajñâtâ, yasyâṃ varshâyogyapîṭhaphalakâdau yatne kalpoktâ dravyakshetrakâlabhâvasthâpanâ kriyate, sâ "shâḍhapaurṇamâsyâm pañcapañcadinavṛiddhyâ yâvad bhâdrapadasitapañcamyâṃ cai 'kâdaçasu parvatithishu kriyate. gṛihijñâtâ tu yasyâṃ sâṃvatsarikâtîcârâlocanaṃ luñcanam Paryushaṇâkalpasûtrakarshaṇaṃ caityaparipâṭî ashṭamaṃ sâṃvatsarikapratikramaṇaṃ ca kriyate. yayâ ca vrataparyâyavarshâṇi gaṇyante, sâ nabhasyaçuklapañcamyâṃ Kâlakasûryâdeçâc caturthyâm api janaprakaṭaṃ kâryâ. yat punar abhivardhitavarshe dinaviṃçatyâ paryushitavyam ity ucyate, tat siddhântaṭippanânâm anusâreṇa, tatra hi: yugamadhye pausho yugânte câ 'shâḍha eva vardhate, nâ 'nye mâsâs; tâni câ 'dhunâ na samyag jñâyante, 'to dinapañcâçatai 'va paryushaṇâ saṃgate 'ti vṛiddhâḥ. tataç ca kâlâvagraho jaghanyato: nabhasyasitapañcamyâ ârabhya

kârttikacaturmâsântaḥ saptatidinamânaḥ; utkarshato varshâyogyakshetrântarâbhâvâd âshâḍhamâsakalpena saha vṛishṭisâdbhâvât, mârgaçîrsheṇâ 'pi saha shaṇ mâsâ iti. dravyakshetrakâlabhâvasthâpanâ cai 'vaṃ. dravyasthâpanâ: tṛiṇaḍagala(?)kshâramallakâdînâm paribhogaḥ, sacittâdînâm parihâraḥ. tatra sacittadravyaṃ çaiksho na pravrâjyate atiçraddhaṃ râjânaṃ râjâmâtyâdikaṃ vâ vinâ, acittadravyaṃ vastrâdi na gṛihyate, miçradravyaṃ çaikshaḥ sopadhikaḥ. evam âhâravikṛitisaṃstârakâdidravyeshu paribhogaparihârau yojyau. kshetrasthâpanâ: sakroçaṃ yojanaṃ, kâraṇe bâlaglânavaidyaushadhyâdau catvâri pañca vâ yojanâni. kâlasthâpanâ: catvâro mâsâ, yac ca tatra kalpate, bhâvasthâpanâ: krodhâdînâṃ viveka, îryâbhâshâdisamitishu co 'payoga; iti kṛitaṃ vistareṇa. S. This exposition is clear on the whole, but some of its details I do not understand.

9) tatro 'dakârdraḥ karo yâvatâ çushyati, tâvân kâlo jaghanyaṃ landam, utkṛishṭam pañcâ 'horâtṛ̣îs, tayor antaram madhyam. S.

14) *atthegaiyâṇaṃ* ityâdi: asty etad yad ekeshâṃ sâdhûnâm purata evam uktapûrvam bhavati, gurubhir iti gamyate. cûrṇau tu: *atthegaiyâ âyariyâ* ity uktam, *atthaṃ bhâsei âyario* iti vâcanât; artha eva anuyoga eva, ekâyitâ ekâgratâ, arthaikâyitâs teshâm. athavâ 'sty etad yad ekeshâm âcâryâṇâm idam uktam bhavatî 'ty evaṃ vyâkhyeyam; tatra shashṭhî tṛitîyârthe tataç câ "câryair idam uktam bhavati. S. *atthiṇaṃ* has the same meaning in § 19.

paḍigâhittae is rendered *pratigrahîtum*, which would regulary become **paḍiggahittae*. पडिगाहित्तए might be a mistake of the transcribers for पडिग्गहित्तए. But the word occurs too frequently for that. Besides, double *g* is generally written ग, which sign, however, is never used in our word. *paḍigâhittae* (also written *paḍigâhettae*) is the infinitive of the causative *paḍigâhe* = *pratigrâhaya*. From the same base are derived the forms *paḍigâhe* (which I take to be the 2d person of the imperative, though it is rendered by *pratigṛihṇîyâs*, just as *dâve* by *dadyâs*) and *paḍigâhehi*. The causative bases *paḍigâhe* and *dâve* are used for the simplex.

18) This paragraph has been translated in the Introd. p. 27 note.

kvacit *pâhisi*-sthâne *dâhisi tti* dṛiçyate tac câ 'tihṛidyaṃ svayaṃ vâ bhuñjîthâ anyasâdhor vâ dadyâ iti. evam ukte gṛihiṇâ *se* tasya sâdhoḥ kalpate etc. S.

19) *kaḍâiṃ ti* kṛitâni tair anyair vâ çrâvakatvaṃ dâne çrâddhatvaṃ vâ grâhitâni; *pattiyâiṃ* pratyayitâni prîtikarâṇi vâ; *thijjâiṃ ti* sthairyam asty eshv iti sthairyâṇi [the neuter abstract instead of the adjective, just as *ârogga*, *pâmokkha* etc.] prîtau dâne ca sthirâṇi; *vesâsiyâiṃ ti* dhruvaṃ lapsye 'haṃ tatre 'ti viçvâso yeshu vaiçvâsikâni; *sammayâiṃ ti* sammatayanti praveçâni; *bahumayâiṃ ti* bahavo 'pi sâdhavo nai 'ko dvau vâ matâ yeshu

41) icche 'tyâdi, icchâ ced asti tadâ etc. S.

44) cakshushâ jñâtvâ dṛishṭvâ ca pratilekhitavyâni parihartavyatayâ vicâraṇîyâni . . . . . panaka ullî sâ ca prâyaḥ prâvṛishi bhûmikâshṭhabhâṇḍâdishu jâyate, yatro 'tpadyate, taddravyasamavarṇaç ca. *nâmaṃ paṇṇatte* iti nâma iti prasiddhau. 2. bîjasû-

kshmaṃ: kaṇikâçâlyâdibîjânâṃ *nahî* 'ti rûḍhâ nakhikâ. 3. haritasûkshmaṃ: navodbhinnam pṛithivîsamavarṇaṃ haritaṃ tac câ 'lpasaṃhananatvât stokenâ 'pi vinaçyate. 4. pushpasûkshmaṃ: vaṭodumbarâdînâṃ tatsamavarṇatvâd alakshyaṃ tac co 'cchvâsenâ 'pi virâdhyate. 5. aṇḍasûkshmam: uddaṃçâ madhumakshikamatkuṇâdyâs, teshâm aṇḍam uddaṃçâṇḍam; utkalikâṇḍaṃ lûtâpuṭâṇḍam; pipîlikâṇḍaṃ kîṭikâṇḍam; halikâ gṛihakokilâ vrâhmaṇî vâ tasyâ aṇḍaṃ halikâṇḍam; *hallohaliyâ ahiloḍî saraḍî kakkiṇḍî 'ty* ekârthâḥ, tasyâ aṇḍam; etâni hi sûkshmâṇi syuḥ. 6. layanam: âçrayaḥ sattvânâṃ, yatra kîṭikâdyanekasûkshmasattvâ bhavantî 'ti. layanasûkshmaṃ yathâ: uttiṅgâḥ bhûyakâ gardabhâkṛitayo jîvâs teshâṃ layanam bhûmâv utkîrṇagṛiham uttiṅgalayanam. bhṛigu çushkabhûrâjî jalaçoshânantaraṃ kedârâdisphuṭitâ dalir ity arthaḥ. *ujjae tti* bilam (ṛijubilaṃ, Subodhikâ); tâlamûlakaṃ tâlamûlâkâram adhaḥ pṛithu upari sûkshmaṃ vivaram; çambûkâvarttam bhramaragṛiham. 7. snehasûkshmam: *osa tti* avaçyâyo yaḥ khât patati himasṭyânodabinduḥ; mihikâ dhusarî; karakâ ghanopalaḥ; haratanur bhûmiḥsṛitâtṛiṇâgrabindurûpo yo yavâṅkurâdau dṛiçyate. 8. S.

46) âcâryaḥ sûtrârthavyâkhyâtâ digâcâryo vâ; upâdhyâyaḥ sûtrâdhyâpakaḥ; sthaviro jñânâdishu sîdatâṃ sthirîkartâ udyatânâm upavṛiṃhakaç ca, pravartako jñânâdishu pravartayitâ ..... gaṇî yasya pârçve âcâryâḥ sûtrâdy abhyasyanti, gaṇino vâ 'nye âcâryâḥ sûtrâdyartham upasampannâḥ, gaṇadharas tîrthakṛicchishyâdiḥ, gaṇâvacchedako yaḥ sâdhûn gṛihîtvâ bahiḥ kshetre âste gacchârthaṃ kshetropadhimârgaṇâdau pradhâvanakartâ sûtrârthobhayavit; yaṃ vâ spardhakâdhipatitvena sâmânyasâdhum api puraskṛitya viharati ..... S.

pratyapâyam apâyam apâyaparihâraṃ ca jânanti. pratikûlo 'pâyasya pratyapâya itî vigraheṇâ 'pâyaparihâre 'pi pratyapâyaçabdo vartate. S.

47) vihârabhûmiç caityagamanaṃ vicârabhûmiḥ çarîracintâdyarthaṃ gamanam. S.

The scholiasts explain *duijjattae* by *hiṇḍitum*. It is, I think, a denominative verb from the base *dûta*, Skṛt.: **dûtîyati* in the sense of: he runs as messenger, though that word would become in Prâkṛit **dûijjai*. Or is *duijjai* derived from the base *duia* = *dvitîya*?

51) apaçcimamaraṇântas tatrabhavâ, ârshatvâd uttarapadavṛiddhau, apaçcimamâraṇântikî sâ câ 'sau saṃlekhanâ tasyâ *jûsaṇa tti* sevâ, tayâ *jûsie tti* kshapitaçarîro 'ta eva pratyâkhyâtabhaktapânaḥ; pâdapopagataḥ kṛitapâdapopagamanaḥ. S.

52) âtâpayitum ekavâram âtape dâtum; pratâpayitum punaḥ punaḥ .... sthânam ûrdhvasthânaṃ tac ca kâyotsargalakshaṇam. S. I have not been able to make out the exact meaning of *kâyotsarga*. I suppose *kâyotsarga* means 'the remaining of the body in a posture adopted for penance, devotion, etc'.

53) anuccâkucikasya, kuñca parispande, akucikâ 'parispandâ

niçcalâ yasya kambikâ na calati, adṛiḍhabandhane hi saṃgharshân matkuṇakunthvâdivadhaḥ syât. uccâ hastâdi yâvat, yena pipîlikâdivadho na syât, sarpâdir vâ na daçet; uccâ câ 'sâv akucâ co 'ccâkucâ kambâdimayî çayyâ sâ vidyate yasyâ 'sâv uccâkuciko, na uccâkuciko nîcasaparispandaçayyâkas tasya. anarthakabandhinaḥ pakshamadhye 'narthakaṃ niḥprayojanam ekavâro 'pari dvau trîṃç caturo vâ vârân kambâsu bandhân dadâti, catur upari bahûni vâ 'ḍḍakâni (?) badhnâti, tathâ ca svâdhyâyapalimanthâdayo doshâḥ. yadi cai 'kâṅgikaṃ campakâdipaṭṭaṃ labhyate, tadâ tad eva grâhyam bandhanâdiprakriyâparihârât. amitâsanikasya abaddhâsanasya sthânât sthânântaraṃ hi muhur muhuḥ saṃkrâman sattvavadhaḥ pravartate; anekâni vâ âsanâni sevamânasya anâtâpinaḥ saṃstârakapâtrâdînâm âtape 'datus, tatra ca panakasaṃsaktyâdayo doshâ upabhoge ca jîvavadhaḥ. upabhogâbhâve co 'pakaraṇam adhikaraṇam eve 'ti. asamitasye "ryâdishu etc. S.

55) *tau uccârapâsavaṇabhûmîo* iti. anadhisahishṇos tisro 'ntaḥ, adhisahishṇoç ca bahis tisraḥ. dûravyâghâte madhyâ tadvyâghâte âsannâ ity âsannamadhyadûrabhedât tisraḥ .... *osannaṃ ti* prâyeṇa bâhulyene 'ty arthaḥ. S.

56) *tuo mattaya* (*!*) *tti* trîṇi mâtrakâṇi tadabhâve hi velâtikramaṇavegadhâraṇe âtmavirâdhanâ, varshati ca bahirgamane saṃyamavirâdhanâ. atra cûrṇiḥ: *bâhiṃ tassa gumminyâdigahaṇaṃ teṇa mattae vosirittâ bâhiṃ nittâ pariṭṭhavei, pâsavaṇe vi abhiggahito dharei tassâ sai jo jâhe vosirai so tâhe dharei, na nikkhivai. suvaṃto vâ ucchaṃge ṭhitayaṃ ceva uvariṃ daṃḍae vâ doreṇa baṃdhati gose asaṃsattiyâe bhûmîe pariṭṭhavei tti.* S. The Kiraṇâvalî and Kalpalatâ give the same quotation, but offer no explanation.

57) The reason for shaving the head, or tearing out the hair, is: keçeshu hi apkâyo lagati sa ca virâdhyate, tatsaṅgâc ca shaṭpadikâḥ sammûrchanti, tâṃç ca kaṇḍûyamânaḥ khaṇḍayati nakhakshataṃ vâ çirasi karoti. S. The *loca* is preferred to the cutting of the hair because by the latter process 'shaṭpadikâç chidyante'.

pakkhiyârovaṇa tti pâkshikam bandhadânaṃ saṃstârakadavarakâṇâm pakshe pakshe bandhâ moktavyâḥ pratilekhitavyâç ce 'ty arthaḥ; athavâ âropaṇâ prâyaçcittam pakshe pakshe grâhyaṃ sarvakâlaṃ viçeshato varshâsu. S.

59) iha pravacane 'dyai 'va paryushaṇâdine, kakkhata: uccaiḥçabdaḥ, kaṭuko: jakâramakârarûpo, vigrahaḥ kalahaḥ samutpadyate. S. I do not know, which words are indicated by the initials *m* and *j*..

60) varshâsû 'pâçrayâs trayo grâhyâḥ saṃsaktijalaplâvanâdibhayât. *taṃ* iti padaṃ tatre 'ty arthe sambhâvyate. *veuvviyâ paḍilehâ* kvacic ca *veuṭṭiyâ paḍilehâ* iti dṛiçyate, ubhayatrâ 'pi punaḥ punar ity arthaḥ. *sâijjiyâ pamajjaṇâ* iti, ârshe: *je bhikkhû hatthakammaṃ karei kariṃtaṃ vâ sâijjai tti* vacanât, *sâijji* dhâtur âsvâdane vartate. tata upabhujyamâno ya upâçrayaḥ sa,

kayamâṇe kaḍe tti nyâyât *sâijjiu tti* bhaṇyate. tatsambandhinî pramârjanâ sâijjiyâ. yasminn upâçraye sthitâs tam prâtaḥ pramârjayanti, bhikshâgateshu sâdhushu, punar madhyâhne, punaḥ pratilekhanâkâle ṭritîyapraharânte, iti vâracatushṭayam pramârjayanti varshâsu, ṛitumadhye triḥ. ayaṃ ca vidhir asaṃsakte, saṃsakte tu punaḥ punaḥ pramârjayanti, çeshopâçrayadvayaṃ tu pratidinam pratilikhanti pratyavekshante: mâ ko 'pi tatra sthâsyati, mamatvaṃ vâ karishyatî 'ti. ṭritîyadivase pâdaproñchanakena pramârjayanti. ata uktam: *veuvviyâ paḍileha tti* kvacit *sâijjiyâ paḍileha tti* dṛiçyate, tatrâ 'pi pratilekhanâpramârjanayor aikyavivakshayâ sa evâ 'rthaḥ. S.

61) avagṛihyo 'ddiçyâ 'ham amukâṃ diçam anudiçaṃ vâ yâsyâmî 'ty anyasâdhubhyaḥ kathayitvâ. S.

pratijâgrati praticaranti gaveshayanti. S.

62) varshâkalpaushadhavaidyârthaṃ glânasârâkaraṇârthaṃ vâ yâvac catvâri pañca vâ yojanâni gatvâ pratinivarteta. S.

63) etam pûrvoktaṃ sâṃvatsarikaṃ varsharâtrikaṃ sthavirakalpam; yady api kiṃcij jinakalpikânâm api sâmânyaṃ, tathâ 'pi bhûmnâ sthavirâṇâm evâ 'tra sâmâcârî 'ti sthavirakalpakamaryâdâṃ yathâsûtraṃ yathâ sûtre bhaṇitaṃ, na sûtravyapetaṃ, tathâ kurvataḥ kalpo bhavati, anyathâ tv akalpa iti yathâkalpam; evaṃ kurvataç ca jñânâditrayalakshaṇo mârga iti yathâmârgam; yathâ tathyaṃ yathai 'va satyam upadishṭam bhagavadbhis tathâ samyag yathâ sthitam. *kâeṇa tti* upalakshaṇatvât kâyavâṅmanobhiḥ . . . . . spṛishṭvâ âsevya; pâlayitvâ atîcârebhyo rakshayitvâ; çodhayitva çobhayitvâ vâ vidhivatkaraṇena; tîrayitvâ yâvaj jîvam ârâdhya. S.

64) iti bravîmî 'ti çrîBhadrabâhusvâmî svaçishyân prati brûte: ne 'daṃ svamanîshikayâ bravîmi, kiṃ tu tîrthakaragaṇadharopadeçene 'ti. anena ca gurupâratantryam abhihitam. S.

GLOSSARY.

jayaṇa (jaiṇa) jayana 28.
Jayaṃta n. pr. Th. 4.
Jayaṃtî name of a çâkhâ Th. 4.
jayâ (ṇaṃ) yadâ corr. to tayâ ṇaṃ 91, 107, 131.

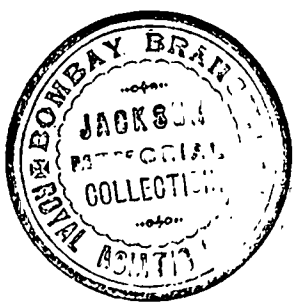
Druck von G. Kreysing in Leipzig.



Additions and Corrections.

---

page 9 *line* 27 *for* Ṭika *read* Ṭikâ.

„ 13 *in the note v.* 4 *for* thâṇaṃ *read* ṭhâṇaṃ.

„ 21 *add*: It should be remarked that I have not aimed at consistency regarding the orthography of the Jaina Prâkrit. I thought it preferable in a first edition of a Jaina book to show how the case stands. It would have been easy to adopt one method of spelling throughout the whole book e. g. to write always *ṇṇ* or *nn*. But instead of doing violence to the instinct of inconstancy which seems to be planted in the Indian breast, I usually have adopted the spelling of the oldest MS. A when confirmed by other MSS. Hence the same word is not always spelt in the same way.

„ 25 *line* 34 *add*: and contains 3040 granthas *after* 1307 AD.

„ 29 *line* 33 *add*: The MSS. of the Kalpasûtra may be classed into three groups: 1) MS. A. It contains the best text. 2) MSS. BEM. They contain the *vulgata*. 3) MSS. CH, a mixed text, usually siding with A, but not unfrequently with the second class.

30 *add*: For the Digambara legends about Bhadrabâhu see Lewis Rice: Bhadra Bâhu and Çravaṇa Belgoḷa. Ind. Ant. III p. 153 sqq. In the Digambara tradition of Kanara Bhadrabâhu is made the leader of an emigration from Northern India. Amongst his disciples is Candragupta, king of Pâṭaliputra, who had received *dîkshâ*.

„ 34 *note* 5,8 *for* EHM *read* CHM.

„ 36 *line* 4 *add* icchiya paḍicchiyaṃ eyaṃ, Devâṇuppiyâ! *after* Devâṇuppiyâ!

„ 36 „ 17 *for* tâyattisagâṇâṃ *read* tâyattisagâṇaṃ.

„ 36 „ 23 „ soṇâvaccaṃ *read* soṇâvaccaṃ.

„ 39 „ 18 *and* 21 *for* jaṇ ṇaṃ *read* jaṇ ṇaṃ.

„ 40 „ 17 *for* vinnoṇaṃ *read* viṇṇoṇaṃ.

„ 40 „ 19 „ parinikkhamai *read* paḍinikkhamai.

„ 40 *note* 27,12 *for* paḍi° CH, °oiA *read* parinikkhamoi A.

„ 41 *line* 2 *for* tti *read* ti.

„ 41 „ 12 „ bhûo *read* bbhûo.

„ 42 „ 12 „ bhûṇi „ bhûmi.

„ 42 „ 30 „ ûsiya „ ûsiya.

„ 43 „ 4 „ payarâiroya *read* payarâiroga.

„ 43 „ 28 „ camikara „ câmikara.

„ 43 „ 30 „ tamya „ taṇṇya.

page 44 line 7 *for* laṃbhaṃta *read* laṃbaṃta.
„ 44 „ 14 „ dasa-disáó „ dasa disáo.
„ 44 „ 25 „ pâyaohiṃ „ pâyaohiṃ [12].
„ 44 „ 25 „ câû „ câru.
